Your Motorola Two-Way radio complies with the following RF energy guidelines (IEEE, ICNIRP or FCC). Non-conductive accessories may exceed the applicable RF exposure limits. This equipment complies with FCC/RCC radiation exposure regulations. It contains transmitters that must be used in strict accordance with the manufacturer’s instructions. Any unauthorized changes or modifications to this equipment could void the user’s authority to operate it.

Note: If a radio has been repaired or reprogrammed, the user must ensure that the repaired or reprogrammed equipment aligns with the equipment authorization for this radio to avoid a violation of the FCC rules. All transmitters must be operated in accordance with the instructions provided by the manufacturer. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

1. Reorient or relocate the receiving antenna.
2. Increase the separation between the equipment and receiver.
3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
4. Consult the dealer or an experienced radio/TV technician for help.

Note: This device complies with Industry Canada license-exempt RSS standards. Operation is subject to the following two conditions:

1. This device may not cause interference and
2. This device must accept any interference, including interference that may cause undesired operation of the device.

Basic Radio Operations

To select a channel:

1. Press the Speaker button to enter Menu.
2. Press the / button one time to enter Menu.
3. Press the 0 (zero) or the 9 (nine) button to the required channel. An extended press of the button changes the channel rapidly.
4. Press PTT button to select the channel and press the speaker button to set the selection.

To adjust the volume:

1. Press the PTT button to set the volume audio level at a comfortable level. After the volume is set to a comfortable level, the volume system will operate automatically.

To mute the radio:

1. Press the Mute button.
2. Press the / button one time to enter Menu.
3. Press the M button to turn on mute.
4. Press the / button one time to exit Menu.

To key beep:

1. Press the / button one time to enter Menu.
2. Press the PTT button to mute the radio.
3. Press the / button one time to turn off Key Beep function.
4. Press the / button one time to exit Menu.

To change the key beep volume:

1. Press the / button one time to enter Menu.
2. Press the M button to change the key beep volume.
3. Press the / button one time to turn off Key Beep function.
4. Press the / button one time to exit Menu.

To check the battery level:

1. Press the / button one time to enter Menu.
2. Press the M button to check the battery level.
3. Press the / button one time to turn off the battery check.
4. Press the / button one time to exit Menu.

Note: When the battery level is low, the battery icon will appear next to the battery level.

Note: If you do not use your radio for one year, the battery will be drained.

Note: If a radio has been repaired or reprogrammed, the user must ensure that the repaired or reprogrammed equipment aligns with the equipment authorization for this radio to avoid a violation of the FCC rules. All transmitters must be operated in accordance with the instructions provided by the manufacturer. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
