MOTOTRBO R5 portable radio accessories

MOTOTRBO R5 accessories

Remote Speaker Microphones

MOTOTRBO R5 connects teams, helping boost efficiency and safety with clear, loud audio that cuts through background noise and intuitive status indications and controls so workers can focus on their tasks, all in a tough, compact device that's built to last. The RM560 and RM530 features the AI trained noise suppression feature which minimizes the background noise for clearer communication. This is a compact and durable windporting remote speaker microphone.

MOTOTRBO R5 accessories

WP300 Wireless Bluetooth PTT POD

WP300 enables instant, intuitive and efficient Push-to-Talk communication, giving users the flexibility to radio call functionalities when paired with the MOTOTRBO devices. WP300 works as remote PTT POD device or as audio device when earpiece is attached. Provides wireless control even if radio is out of reach.

*WP300 is not offer in EMEA due to R5 do not offer Bluetooth model in EMEA

Optimized for digital

Make sure to only use Motorola approved and certified MOTOTRBO audio accessories, as these accessories have been optimized for performance in both digital and analog modes. You may experience chopper noise if Motorola digital approved accessories are not used.

Loud and Clear Audio

When pairing a RM780, RM760, or RM730 remote speaker microphone with the R7 radio, the enhanced single input noise cancelling feature will suppress the background noise for clearer communication.

Innovative audio technology enables you to hear and be heard over crowd noise, machinery and blaring sirens. Motorola Solutions' wind and water shielding technology ensures audio is loud and clear.

Rugged and dependable, the RM series remote speaker microphones are IP68 rated for use in harsh environments and weather. The RM780 and RM760 also meet the work-when-wet requirements having enhanced water drainage and top quality materials to ensure you get the best audio experience.

Intelligent audio: your calls, always at the perfect volume

Set your volume once and depend on your accessory to listen for changes in background noise, adjusting the volume automatically.

RM780 RSM

**HazLoc Details: For more information on which accessories are approved by Underwriters' Laboratory (UL) with certain MOTOTRBO models, please consult the manual provided with each UL-approved MOTOTRBO portable.

¹ Requires ION radio with software version M-Ion.2022.03 and beyond.

² RSMs above require to use PMLN8120 3.5mm earpiece in order to operate a telephony call when connecting to Ion radio.

MOTOTRBO R7 Radio Accessories

Remote Speaker Microphones

The NS750 IMPRES Remote Speaker Microphone (RSM) is built for frontline workers in tough, loud, mission critical environments. It is built with windporting microphones that cancel the mechanical effects that wind has on the microphone. With additional advantage of an omnidirectional microphone is its able to capture noise from every direction. Smart audio switching allows audio to be easily switched between the RSM audio and the secondary earpiece or headset.

ADD-ON ACCESSORIES & REPLACEMENT PARTS

FOR THE COLOR IDENTIFICATION LABEL

Further organise your devices across your workforce with the NS750's colour identification labels, making it easier to separate and understand various teams, functions or roles.

	PMLN8466: (Red, 10 pcs/pack)
	PMLN8468: (Yellow, 10 pcs/pack)
	PMLN8465: (Blue, 10 pcs/pack)
	PMLN8469: (Silver 10 pcs/pack)
	PMLN8464: (Green, 10 pcs/pack)
	PMLN8523: (Orange 10 pcs/pack)
	0104068J78 Replacement Swivel Clip

The NS750 RSM is designed for ease of use featuring dual textured push-to-talk (PTT) buttons and optional colour identification labels to go over the front PTT button to help identify various teams and their responsibilities. With this RSM, you can communicate with clarity and ease across the frontline to efficiently and effectively get the job done.

MOTOTRBO R7 accessories

WP300 Wireless Bluetooth PTT POD

WP300 enables instant, intuitive and efficient Push-to-Talk communication, giving users the flexibility to radio call functionalities when paired with the MOTOTRBO devices. WP300 works as remote PTT POD device or as audio device when earpiece is attached. Provides wireless control even if radio is out of reach.

COMPATIBILITY		ACCESSORY		FEATURES									
PORTABLE RADIOS	DESCRIPTION	PART NUMBER	EARPIECE TYPE	PTT	EMERGENCY BUTTON	VOLUME CONTROL (HIGH/LOW)	Programmable Button	AUDIO JACK (3.5mm)	NFC	TOUCH / STANDARD PAIRING	RANGE (FEET LINE OF SIGHT)	IP RATING	TALK TIME (HOURS) 5/5/90 DUTY CYCLE
R7	 WP300 Wireless Bluetooth PTT POD	PMLN8298 ¹					Call Button/Multifunctional Button (MFB)			Standard Pairing	30m	IP67 (Pod alone with dust cover)	18 hours
	 WP300 Wireless Bluetooth PTT POD with Surveillance Earpiece	PMLN8401 ¹	Clear rubber eartip				Call Button/Multifunctional Button (MFB)			Standard Pairing	30m	IP67 (Pod alone with dust cover)	18 hours

The QR barcode above can be used for users to scan and access the "Accessory Manager" App from the Google Play Store to upgrade the WP300 firmware to the latest version. (The Apple App Store version will be available in a future release).

¹ Requires R7 radio with software version R02.25.02.1000 and beyond.

Extended battery life. Built to last.

You face challenges every day. Battery life shouldn't be one of them. IMPRES 2 batteries, when combined with an impres 2 charger, deliver up to 60% more charging cycles than traditional lithium ion batteries, so they're on the job longer. Which means you can stock fewer spares, and replace fewer batteries.

What is IMPRES self-calibration?

IMPRES batteries with self calibration feature can be identified through this logo on the battery label. These batteries do not require long hours of IMPRES calibration or recondition process, when charged with:

- IMPRES Single Unit Charger

- IMPRES 2 Multi Unit Charger (SW ver V2.01* and above)

* If the R7 IMPRES battery is initially inserted into the charger with older software, it will begin the initialization process with a solid yellow indication. Do not remove the battery from the charger until the charger indicates solid green. This process may take up to 8 hours.

How do IMPRES batteries and chargers save money?

They reduce the number of spare batteries you would need to buy and increase the time before you need replacements. Only IMPRES batteries can be charged 150 additional times versus a standard battery – a 43% increase in charge cycles. If you charge radios two to three times a week, you will get more than an extra year out of every IMPRES battery.

Only IMPRES batteries can be charged **150 times more** than standard batteries and last **43% longer**

Charging solutions

Choose from a variety of solutions including single-unit, multi-unit, travel and in-vehicle chargers and be confident your radio is charged and ready to go the moment you need it.

IMPRES 2 vehicle charging cradle

The IMPRES 2 charging cradle allows you to communicate efficiently, while your MOTOTRBO Ion radio is securely mounted in your vehicle. The cradle is mounted using a compatible RAM mount (comes with RAM Mounts' Drill Down Adapter) enabling safer driving. This charging cradle was designed to give you full access to radio functions including the front screen, camera, push-to-talk, buttons and knobs.

MOTOTRBO portable radio accessories

IMPRES battery management tools

With the unique IMPRES Battery Fleet Management systems, efficiently manage your batteries with real-time data not available with other manufacturers' batteries. Our easy-to-use software applications show you if there is enough capacity for a full shift, alert you to low capacity batteries, prevent downtime and eliminate throwing batteries out prematurely.

Carry case with 2.5" fixed belt clip (radio sold separately)

MOTOTRBO ION plastic carry case

The lightweight, plastic carry cases simplify one handed device access without compromising device security so your hands are free and information is within reach. A quick connect 2.5 in fixed belt clip or swivel belt loop also allows you to easily disconnect and quickly retrieve your radio when needed. The swivel belt loops enable rotation of the radio to a comfortable position, while belt clips will hold your MOTOTRBO Ion securely on your waist.

Key features

- Secure retention allows simple one hand device access
- Design protects MOTOTRBO Ion's touch screen by keeping it facing in on the belt
- Built-in audio ports enable you to leave your radio in the case for audio applications without degrading device transmit and receive performance
- Accommodates connection of all compatible audio accessories

Carry case with 2.5in swivel belt loop (radio sold separately)

MOTOTRBO R7 & ION portable radio accessories

Antennas

Motorola Solutions' redesigned antennas provide convenience without compromising performance. Shorter and more compliant conforming to the user than other MOTOTRBO antennas, MOTOTRBO Ion antennas are comfortable to wear and easier to use without snagging on clothing.

MOTOTRBO portable radio accessories

Operations critical performance focused on durability and flexibility to keep you connected, productive and safe on the job

MOTOTRBO™ radios are already best-in-class, but to help you work at your best, you need enhancements targeted to your specific workplace. Motorola Solutions has developed an expansive line of accessories, with unique features designed to optimize the performance of your radio in your work environment.

Motorola's exclusive energy and audio features are made for operation critical jobs

IMPRES™ batteries and chargers: your battery, safer, smarter, powered for longer

Eliminate the guesswork and get more from every battery. Maximize every charge and eliminate the surprise of "low battery alerts" with IMPRES Audio solutions. IMPRES chargers tell you exactly how much capacity is in an IMPRES battery before you attach it to your radio and exactly when an IMPRES battery has reached the end of service life. Enjoy 43% longer battery life from IMPRES over non-IMPRES batteries – without spending time and effort on maintenance or record keeping. With IMPRES Battery Fleet Management Software, you can check the status of 25 or 25,000 batteries at a glance, from one computer, giving you the power to manage your complex power solutions.

IMPRES™ audio

Make sure every word is heard regardless of the level or direction you're speaking into the accessory. Eliminate repeating yourself with clear audio every time from Motorola exclusive IMPRES Audio technology. Whether you need to talk loudly or quietly, into or away from the accessory, IMPRES Audio lowers the loud talker level and raises the soft talker level automatically so listeners do not have to adjust the volume depending on who is talking. Policing a busy airport, fixing equipment on a noisy production floor or assisting guests in a quiet hotel, IMPRES Audio promises a high quality communication experience.

Flexible and customizable: accessorize your device to maximize comfort and usability

Operations critical wireless: your radio, unleashed

Work with your radio like never before. Place your radio on a desk or cart, in a purse, medical bag or backpack and converse seamlessly with your wireless earpiece up to 30 feet away from your radio. Put your wireless PTT where you want to – on a clipboard, steering wheel or coat pocket – without wires getting in the way. Motorola Bluetooth enabled radios allow both an Operations Critical Wireless PTT and audio accessory to be connected and used at the same time. And Operations Critical Wireless accessories last up to 10 hours – up to 3 times the battery life of commercial Bluetooth® headsets.

Motorola solutions exclusive audio features that ensure your message is heard in the most demanding work conditions

IMPRES™ Audio: i hear you, however you speak
ensure your voice is heard clearer, crisper, and louder regardless of level or direction you're speaking into the accessory.

Intelligent audio: your calls, always at the perfect volume
set your volume once and depend on your accessory to listen for changes in background noise, adjusting the volume automatically so you hear every call.

Dual microphone audio: I hear you, even when you can't hear yourself
virtually block out all background noise in demanding and extreme noise environments so you can always communicate clearly.

Windporting and noise-canceling audio: i hear you, not the wind
reduce the effect of wind and other outdoor noises so your messages are always heard clearly.

What are the benefits of the industrial noise-canceling (Inc) remote speaker microphone?

Suppresses high noise so you hear clearly – The dual-microphone design suppresses background noise so your message gets through. The large 1-watt speaker delivers the loudest, clearest audio available – up to 25% more than other MOTOTRBO RSMs.

Wear it while you work and communicate freely – Best practices is always to speak directly into your RSM. This is especially important in high noise environments. In moderate noise environments the INC RSM allows you to clip the RSM to your shoulder or lapel and talk freely with a touch of the prominent push-to-talk button.

Easy to clean dirt, grit and debris – Debris and fine particles can clog remote speaker microphones and reduce the quality of your voice transmissions. With the INC RSM, simply vacuum out the speaker grill (when dry), then brush out the debris using soapy water, rinse and you are ready to go.

> [Experience Dual-Microphone Noise Suppression](#)

Which microphone is right for me?

Windporting – for outdoor, demanding weather, high winds, rain (keep on the shoulder or in front of your mouth).

> hear the difference windporting makes

Industrial noise-canceling (dual microphone noise suppression)

– loud, industrial, outdoor, rain, dusty/dirty environments. To optimize its noise suppression capabilities, hold the RSM 1" directly in front of your mouth or turn your head toward the RSM on your shoulder and speak into the closest microphone on the RSM; also washable.

Noise-canceling – noisy, indoor environments. To optimize its noise reduction capabilities, hold the microphone in the correct use position directly in front of your mouth, facing the source of the noise (as shown in photo).

MOTOTRBO portable radio accessories

Remote speaker microphones

Our robust portfolio of remote speaker microphones and secondary audio accessories are engineered to give you clearer communications even in loud environments. How does impres improve audio performance?

IMPRES enhances the clarity and audio quality of Motorola accessories by reducing ambient noise and improving voice intelligibility.

If you speak quietly or normally, but not directly into a microphone, IMPRES Audio detects changes in your voice and automatically adjusts the transmitted volume so your listener won't have to adjust volume up and down.

> [Experience IMPRES audio](#)

MOTOTRBO portable radio accessories

Surveillance accessories and earpieces

Transmit and receive discreetly with a variety of surveillance kits that feature a streamlined design and rugged cables that withstand tough conditions. A quick-disconnect, durable and comfortable translucent tube enables easy sharing between shifts. Two-wire kits have one wire for receiving transmissions and one wire with a combined microphone and push-to-talk. Three-wire kits feature separate wires for receiving transmissions, push-to-talk and microphone.

Optimized for digital

Make sure to only use Motorola approved and certified MOTOTRBO audio accessories, as these accessories have been optimized for performance in both digital and analog modes. You may experience chopper noise if Motorola digital approved accessories are not used.

How do temple transducers work?

These headsets use transducers that rest on your temple to convert audio into sound vibration and transmit it to your inner ear. If you're using hearing protection or directing heavy traffic, you can hear the audio from your radio and the surrounding environment. Since the transducer sits in front of your ears, you can also wear earplugs and still hear the radio.

*Bluetooth is not embedded in radio. Separate external adapter is required.

How do operations critical wireless accessories help me?

They free you from being physically connected to the radio. This means a line worker can put the radio on a shelf and communicate. A receptionist can place her radio out of sight and confer unobtrusively with staff while welcoming guests. Or a sports trainer can leave the radio in a medical bag while he tends to injured athletes on the field.

> see operations critical wireless accessories in action

* HAZLOC details: For more information on which accessories are approved by Underwriters' Laboratory (UL) with certain MOTOTRBO models, please consult the manual provided with each UL- approved MOTOTRBO portable.

How do impres batteries and chargers save money?

They reduce the number of spare batteries you buy and increase the time before you need replacements. Only IMPRES batteries can be charged 150 additional times versus a standard battery – a 43% increase in charge cycles. If you charge radios two to three times a week, you'll get more than an extra year out of every IMPRES battery.

Only impres batteries can be charged **150 times more** than standard batteries and last 43% longer

What is the long-life cold temperature battery?

The Motorola Original® Long-Life Cold Temperature Lithium Manganese battery has up to 1000 full charge/discharge cycles and is rated to withstand extreme temperatures down to -30 degrees C. Maintenance-free and lightweight, this battery does not require reconditioning or hazardous waste disposal.

MOTOTRBO portable radio accessories

IMPRES battery management tools

With the unique IMPRES Battery Fleet Management systems, efficiently manage your batteries with real-time data not available with other manufacturers' batteries. Our easy-to-use software applications show you if there is enough capacity for a full shift, alert you to low capacity batteries, prevent downtime and eliminate throwing batteries out prematurely.

COMPATIBILITY	ACCESSORY

MOTOTRBO mobile radio accessories

MOTOTRBO mobile radios

Unrivaled voice and data on the go

XPR 5000 / XPR 5000e Series

The XPR 5000 series shares the same connector as the XPR 4000 series accessories enabling easy migration. This portfolio is enhanced with integrated Bluetooth®, giving more flexibility than ever before. Now your drivers can check on packages or walk around the loading dock and stay connected within 30 feet of their radio. A new IMPRES keypad microphone features a four-way navigation button that makes accessing critical features on the large color display, dialing phone numbers and sending text messages easy.

Integrated voice and data on the go

XPR 4000 Series

Handling dispatch for a delivery company or hauling freight across the country, accessories must meet challenging installation and operational requirements. XPR 4000 series mobile accessories are specifically designed for hassle-free communication in a vehicle, for dispatch-enabled communication, and for easy installation.

XPR 2500 Series

The XPR 2500 features a durable telco accessory connector that enables microphones, external speakers and vehicular solutions. Many of the XPR 2500 microphones feature Intelligent Audio. Intelligent Audio listens to sounds in the background and automatically raises or lowers your radio volume so you can always hear clearly. If you're driving an empty bus that quickly fills with chattering children – you will still be able to hear important communication without taking your hands off the wheel to adjust the radio volume.

MOTOTRBO mobile radio accessories

Microphones

Keypad microphones let you easily navigate menus on your XPR 4550 or XPR 5550, dial phone numbers and send text messages. The heavy-duty microphone is easy to use while wearing gloves and the telephone-style handset enables more discreet communication.

How can I communicate safely in my vehicle?

The IMPRES Visor Microphone mounts to your vehicle's visor for safe, convenient communication. Press the external push-to-talk button on the steering wheel to converse without taking your hands off the wheel or your eyes off the road. IMPRES Audio compensates for the distance of the visor mic from your mouth so that your radio communications are loud and clear.

External push-to-talk (PTT)

Activate the PTT or emergency footswitch without having to use the mobile microphone. A simple push button PTT can be held in the hand or mounted in your vehicle for easy access, while the emergency footswitch lets you discreetly activate emergency hands-free when a critical situation arises.

Optimized for digital

Make sure to only use Motorola audio accessories with this digital symbol, it indicates these accessories have been optimized for performance in both digital and analog mode. All accessories with this symbol have been certified and approved for XPR™ 2500 mobile radios.

Long range wireless solutions

Designed for customers who depend on their high power mobile radio for system connection but must work outside of their vehicle. The long range wireless solution allows you to maintain critical communications even on remote job site.

Works up to 100 meters away line-of-sight from the mobile radio, keeping you in communication where you never thought possible.

MOTOTRBO mobile radio accessories

Long range wireless

The long range wireless remote speaker microphone (RSM) pairs instantly with touch pairing to the mobile microphone with Bluetooth gateway.

Plug and play - Just attach the mobile gateway microphone to your radio, align the two devices where indicated by the blue dot and you are ready to go. Voice prompts will walk you through pairing quickly.

Maintain critical communications even on remote job sites

Situation

Keep in touch even on remote job sites when you depend on your high power mobile radio but have to work outside your vehicle. You are a utility worker and need to check the meter readings. You have to park your truck about 100 meters away from the utility box due to access restrictions, yet you stay connected to your radio with your Long Range Wireless Remote Speaker Microphone. You communicate key readings immediately to dispatch. Get your job done safely and more efficiently.

Solution

The Long Range Wireless Remote Speaker Microphone (RSM) pairs instantly with touch pairing to the mobile microphone with Bluetooth gateway. The Bluetooth microphone is compatible with MOTOTRBO XPR 4000 and XPR 5000 series mobile radios. The Long Range Wireless RSM works up to 100 meters away from the mobile radio, keeping you in communication where you never thought possible.

How do mobile wireless accessories help me?

Use your mobile radio like never before and freely move around your vehicle. This means a driver can sort through packages on the back of the delivery truck, a bus driver can check on students in the back of the bus, or a city worker can trim trees from a cherry picker and all can still remain connected to their mobile radio. And by removing the wired connection to a desktop mobile, a dispatcher can walk around the office and manage calls.

MOTOTRBO mobile radio accessories

Operations critical wireless bluetooth® accessories

this portfolio is a game changer for your business as you have the flexibility to leave your truck or walk away from your desk and still remain connected to your radio up to 30 feet away.

Glossary

Frequency band

Most antennas only cover a portion of a frequency band. Our wideband UHF and VHF antennas offer coverage across the entire band, enhancing your communication flexibility.

IMPRES

Get the most out of every battery and eliminate the surprise of “low battery alerts”. IMPRES chargers tell you exactly how much capacity is in an IMPRES battery before you attach it to your radio and exactly when an IMPRES battery has reached the end of service life.

IMPRES Battery Fleet Management is now over the air capable with XPR 7000 and XPR 3000 radios (must use MOTOTRBO software update 2.4 or greater).

IMPRES audio (motorola exclusive)

Ensure your voice is heard clearer, crisper, and louder regardless of level or direction you're speaking into the accessory.

IMPRES batteries and chargers

Get the most out of every battery and eliminate the surprise of “low battery alerts”. IMPRES chargers tell you exactly how much capacity is in an IMPRES battery before you attach it to your radio and exactly when an IMPRES battery has reached the end of service life.

Integrated GPS

To support GPS capability in the radio, the GPS antenna is integrated into the RF antenna. (The XPR 3000/XPR 3000e Series radios do not have GPS capability, but use these antennas.)

Intelligent audio (Motorola exclusive)

Set your volume once. Depend on your accessory to listen for changes in background noise, adjusting the volume automatically so you hear every call.

Intrinsic safety rating

Motorola-approved accessories are a critical part of the overall radio system certified by a recognized testing organization as intrinsically safe. Non-Motorola approved accessories may not be certified for MOTOTRBO and if used, could result in equipment that is NOT approved or unsafe in a hazardous environment.

****Note:** UL = For more information on which accessories are approved by Underwriters' Laboratory (UL) with certain MOTOTRBO models, please consult the manual provided with each UL-approved MOTOTRBO portable.

IP rating

International Protection (IP) is a global standard for rating dust and water protection. The first digit IP5x or IP6x represents increased levels of dust protection. The second digit, IPx7 or IPx8 represents increased levels of water protection.

- **IPx7** represents withstanding submersion in 1 meter of fresh water for 30 minutes.
- **IPx8** represents heating accessory to 27°C higher than the water temperature for 2 hours then immediately immersing it to a depth of 1 meter for another 2 hours.
- **IPx8+Rugged** represents exceeding industry specs by heating accessory to 27°C higher than the water temperature for 2 hours then immediately immersing it to a depth of 2 meters for another 4 hours.

Material

Choose from comfortable and flexible nylon cases, rugged, durable hard leather cases or carry holsters.

Microphone noise suppression

Multi Mic Noise Suppression: Five integrated microphones and Adaptive Audio Engine automatically change the level of noise suppression, microphone gain, Windporting and speaker equalization to produce clear and loud audio in any environment.

Dual Mic Noise Suppression:

Dual-microphone design tracks your voice so that you can keep your eye on what's in front of you while speaking. A digital signal processor (DSP) algorithm helps suppress background noise so you can be heard clearly regardless of the noise around you.

Windporting (Motorola Exclusive):

Windporting reduces the effect of wind and other outdoor noises on your microphone performance and prevents water from clogging the microphone and distorting your transmission.

Noise-cancelling microphones negate crowd or machinery noise so your voice comes through loud and clear anytime you speak directly into the microphone.

Operations critical / enhanced operations critical

This Bluetooth® solution specifically for businesses features simple pairing, high quality audio and fast push-to-talk to ensure every word is transmitted. Enhanced Operations Critical Wireless has all this, plus instant pairing with just a touch of the accessory to the radio's Bluetooth adapter, and intrinsically safe certification for hazardous environments. This means multiple workers on shifts who need grab-and-go device can all pair at the same time without connecting to the wrong radio.

Signal noise rating

Signal-to-noise ratio (often abbreviated SNR or S/N) is a measure used in science and engineering that compares the level of a desired signal to the level of background noise. It is defined as the ratio of signal power to the noise power, often expressed in decibels.

Swivel or fixed loop

Secure to a belt loop and the case swings freely from side to side. The swivel latch system also allows the radio and case to be removed from the belt loop by simply inverting, lifting it up and out of the belt loop. Fixed loops provide a sturdy attachment to your belt.
