**PREMIUM CONTROL ROOM SOLUTION**

**FEATURE-RICH, ROBUST AND TRUSTED**

Motorola Solutions brings you TRBOnet PLUS through cooperation with Neocom Ltd - one of the market leaders for control room solutions.

Exclusively available through Motorola Solutions and supported by our customer service teams, this product offers the most advanced features for radio fleet management, dispatch and voice and data communications. It leverages the enhanced MOTOTRBO wireline network interface which allows dispatchers to interface directly with the system over IP. This improves the system stability, security and reliability but also reduces hardware overheads and can lower maintenance costs. MOTOTRBO Central Room Solutions have undergone stringent quality testing in Motorola Solutions’ labs ensuring they meet the highest standards of quality, solve business critical problems and deliver exceptional customer experiences.

**POWERFUL FUNCTIONALITY**

TRBOnet PLUS keeps operators in complete control of even the most demanding multi-site systems. Designed with the dispatcher in mind, a wide variety of everyday operations can be automated using defined rules and smart tools such as scheduled text messages, voicemails for offline radios or geofencing. Dispatchers can now monitor the status of users and their location with live updates, while assigning tasks to the most relevant resources, and improving personnel safety with automatic alarms when unplanned events occur.

**SIMPLE AND ROBUST**

A key benefit of TRBOnet PLUS is the wireline network interface which establishes a direct link between the control room and the radio system. Connectivity is simplified for a more cost-effective and reliable solution architecture. And dispatchers benefit from an enhanced experience with full transparency, recording of all group and individual calls and more communications security from the radio to the application.

**MODULAR AND FLEXIBLE**

TRBOnet PLUS is modular so you only have to buy the features you need. It can be tailored to individual requirements to ensure optimum performance across a range of industries. It is also easily scalable from small to large systems that are ready to grow with your business as it expands.

**TRIED AND TESTED**

Developed specifically for MOTOTRBO professional digital two-way radio systems, TRBOnet PLUS has been tested in Motorola’s engineering labs to ensure the highest quality performance and seamless integration into the MOTOTRBO system.

**MAXIMISING EFFICIENCY & SAFETY FOR HAZARDOUS CONSTRUCTION SITES**

With specialist teams working to strict deadlines in potentially dangerous situations, reliable communications and personnel monitoring is critical for maximising worker safety and efficiency. MOTOTRBO Control Room Solutions keep everyone connected so multiple teams can coordinate operations. Real-time personnel monitoring and automatic alarms provide an immediate response in the event of an emergency.

**MANAGING TRANSPORT SERVICES MORE EFFICIENTLY**

Whether you are coordinating ground services for an airport, bus depot or train network, efficiency in the distribution centre is key. Operators need to monitor and be in constant contact with personnel to ensure the safety of workers and the public. Strong audio coverage across a wide area and efficient dispatch management helps ensure the smooth running of services and fast resolution of issues.

**ENHANCING SAFETY AND OPERATIONS IN REMOTE MINES**

Often located in difficult to access locations where cellular coverage is limited, mining and exploration sites present a unique challenge. To efficiently manage daily operations and ensure worker safety, a reliable voice and data communications infrastructure is required to connect staff at the site with head office. A high performance control room solution enhances dispatch operations, tracks supply vehicles travelling between sites and enables a quicker response to breakdowns and emergencies.

**DELIVER EXCEPTIONAL CUSTOMER SERVICE**

Exhibitions, conferences, hotels and retail centres are fast-paced environments that rely on teams of workers coordinating tasks to ensure optimum service for customers. Managing and monitoring shifts is a key factor in maximising operational efficiency. Integrated MOTOTRBO Control Room Solutions help you stay in constant communication with your teams and let you track who is doing what and where so you can quickly reassign duties should the need arise.

**HOSPITALITY & RETAIL**

**OIL & GAS**

**MINING**

**TRANSPORT**

**MANUFACTURING**

**CONSTRUCTION**

**KEEPING PERSONNEL SAFE ACROSS OILFIELDS**

Maintaining good communication with work teams and ensuring their personal safety is a key priority for oil industry executives, especially in areas of extreme weather. Integrated MOTOTRBO Control Room Solutions boost communications between management and teams with extended call functionality while allowing for the monitoring and management of radio users across vast territories.
TRBOnet PLUS for MOTOTRBO®

**KEY BENEFITS**

- Cost-effective and easy to deploy
- Redundancy can also be built in to improve system availability.

**VOICE AND DATA COMMUNICATIONS**

TRBOnet PLUS provides integrated fully-featured dispatch control over single and multi-site or multi-channel systems. It supports voice communication and data operations for conventional single site repeater, IP Site Connect, Capacity Plus, Linked Capacity Plus and Connect Plus systems by direct wireline interface with the MOTOTRBO network.

At the heart of the MOTOTRBO Control Room Solutions is the enhanced wireline network interface. This simplified architecture establishes a direct connection between the control room solution and system. With no additional hardware required, system stability, security and reliability are improved for more effective dispatching, monitoring and records management.

Utilising the wireline network interface, dispatchers can now communicate directly over IP to the system without having to go through control stations. This makes liaising with radios and talkgroups so much quicker, easier and more effective — essential when dealing with emergencies or reassigning workers to maximise productivity.

The simplified architecture also ensures TRBOnet PLUS is more cost-effective with reduced hardware investment, easier deployment and lower maintenance costs.

Redundancy can also be built in to improve system availability.

**THE MOTOTRBO WIRELINE NETWORK INTERFACE PROVIDES DIRECT CONNECTIVITY BETWEEN THE CONTROL ROOM SOLUTION AND RADIO SYSTEM**

**SYSTEM USING WIRELINE NETWORK INTERFACE**

- **APP CLIENT/SERVER**
- **MOTOTRBO WIRELINE NETWORK INTERFACE**
- **RADIO SYSTEM**
- **RINGS**

**SYSTEM USING DEDICATED CONTROL STATIONS AND ASSOCIATED GATEWAYS**

- **APP CLIENT/SERVER**
- **GATEWAY**
- **CONTROL STATIONS**
- **RADIO SYSTEM**
- **RINGS**

**FEATURE-RICH**

TRBOnet PLUS includes a variety of functional modules for improved fleet management and dispatch. In addition to the comprehensive set of core modules, users can add extra functionality and control with optional modules.

**CORE**

- **FLEET ADMINISTRATION**
  - Efficiently manage fleets and dynamically control radios. Get live status updates and configure the radio to send on/offline reports to the server.
- **EVENT LOGGING**
  - Log all system events including new calls, test messages and status changes. Customize rules, filter and group events or generate reports detailing location and radio status.
- **ALARM & LONE WORKER**
  - Improve the safety of personnel with automatic alarms and lone worker protection. The alarm can also be sent as an automated message, e-mail or SMS.
- **VOICE DISPATCH**
  - Provide communications between the dispatcher and remote radios. Make broadcast, group, private, remote monitor or emergency calls over quicker using programmable shortcuts.
- **EXTENDED ALARM MANAGEMENT**
  - Automatically notify your staff of important events, using job tickets, text messages or calls.
- **IP SYSTEM BRIDGE**
  - Communicate between radios located on different networks. Interconnect geographically distributed systems and set up permanent and dynamic bridging of voice and data calls.
- **VOICE RECORDING**
  - Continuous voice recording of all calls with playback for analysis, reporting or training purposes. Audio files are stored on the Radio Server and Dispatcher.
- **DATA WEB CLIENT**
  - Empower remote dispatchers to access the system using a web interface.
- **AES ENCRYPTION**
  - Secure your communications with the industry standard 256-bit encryption scheme.
- **RF COVERAGE MONITORING**
  - Monitor and manage remote equipment from the control room. The system supports native MOTOTRBO telemetry with multiple profiles supported for different devices.
- **TEXT MESSAGES & EMAIL**
  - Easily communicate with other devices when voice communication is not possible. Send broadcast, group or private text messages. Radio users can text back to the dispatcher.
- **TELEMETRY**
  - Easily integrate into existing on-site IT networks.
- **USER ACTIVITY MONITORING**
  - Log all system events including voice calls, test messages and status changes. Customize rules, filter and group events or generate reports detailing location and radio status.
- **INTEGRATED SECURITY MANAGEMENT**
  - Provide communications between the dispatcher and remote radios. Make broadcast, group, private, remote monitor or emergency calls over quicker using programmable shortcuts.
- **CUSTOM ROLE BASED SECURITY**
  - Customise roles and configure role-based security for system users.
- **MONITORING & MANAGEMENT**
  - Monitor and manage remote equipment from the control room. The system supports native MOTOTRBO telemetry with multiple profiles supported for different devices.
- **MONITORING & MANAGEMENT**
  - Monitor and manage remote equipment from the control room. The system supports native MOTOTRBO telemetry with multiple profiles supported for different devices.
- **JOB TICKETING**
  - Create, assign and monitor job tickets through the radio network to deliver routine tasks more efficiently. Radio users can accept or decline the job ticket by simply pushing a button.
- **TEXT MESSAGES & EMAIL**
  - Easily communicate with other devices when voice communication is not possible. Send broadcast, group or private text messages. Radio users can text back to the dispatcher.
- **GPS TRACKING**
  - Follow workers, vehicles and business assets in real-time to ensure maximum safety and productivity. View routes, set up geo-fencing and log radio movements using a configurable set of rules.
- **INDOOR POSITIONING**
  - Track personnel and location assets inside your facility with a Bluetooth-based indoor location system.
- **PHONE INTERCONNECT**
  - Make and receive calls between MOTOTRBO radios and telephones and also allow dispatchers to make and receive telephone calls in through the dispatcher console.

**OPTIONAL**

- **TRBOnet PLUS for MOTOTRBO® SOLUTION MODULES**
- **Not available for Connect Plus systems**
TRBOnet PLUS

Developed in cooperation with Neocom, a leading edge communications company based in St Petersburg, TRBOnet PLUS is a professional PC-based, wireline client-server dispatch software application exclusively developed for MOTOTRBO™ digital two-way radio systems.

Designed exclusively for MOTOTRBO digital two-way radio systems, this control room solution supports voice communications and data operations in conventional systems, Connect Plus, Linked Capacity Plus, Capacity Plus and IP Site Connect using a direct wireline interface.

**Functional Modules**

With TRBOnet PLUS, operators can monitor audio, data and asset location, as well as provide record management and review events that have taken place. It’s easy to track staff and key assets on a live map, send and receive private text messages to personnel in the field and respond quickly and effectively to emergency situations. Dispatchers can also link multiple agencies or departments with a single touch for even greater flexibility.

The software can be operated over the internet by multiple dispatchers located anywhere using the ‘Remote Dispatch’ function. Detailed reports highlight essential information including audio recordings, texts sent, radio status (on/off) and much more.

Two key advantages of TRBOnet PLUS are its scalability and reliability. Administrators can easily increase the number of users on the radio communication network or its geographical coverage at any time to handle increased demand. And with the simplified wireline network interface, high levels of performance are assured.
