

# STRENGTHEN AND STREAMLINE SECURITY OPERATIONS

## ENTERPRISE COMMAND CENTER SOFTWARE

Our proven, public safety-grade software is built to connect, secure and streamline your enterprise security operations. We have you covered, from first awareness via call for service or automated sensor, to immediate communication over multiple devices and networks, throughout response and to final resolution.

### CommandCentral Aware

View and interpret multiple data sources on a single map for a real-time, consolidated operating picture of personnel, incidents and video as a situation unfolds.

### Rave Mobile Safety

Support emergency coordination efforts by communicating operational updates and alerts so people are better informed to take appropriate action.

## INCREASED AWARENESS

See what is happening as it happens. Get alerted to significant events and quickly locate resources and responders to protect people, property and assets.

## KEEP TEAMS SAFE ENSURE SECURE OPERATIONS CREATE EFFICIENT WORKFLOWS

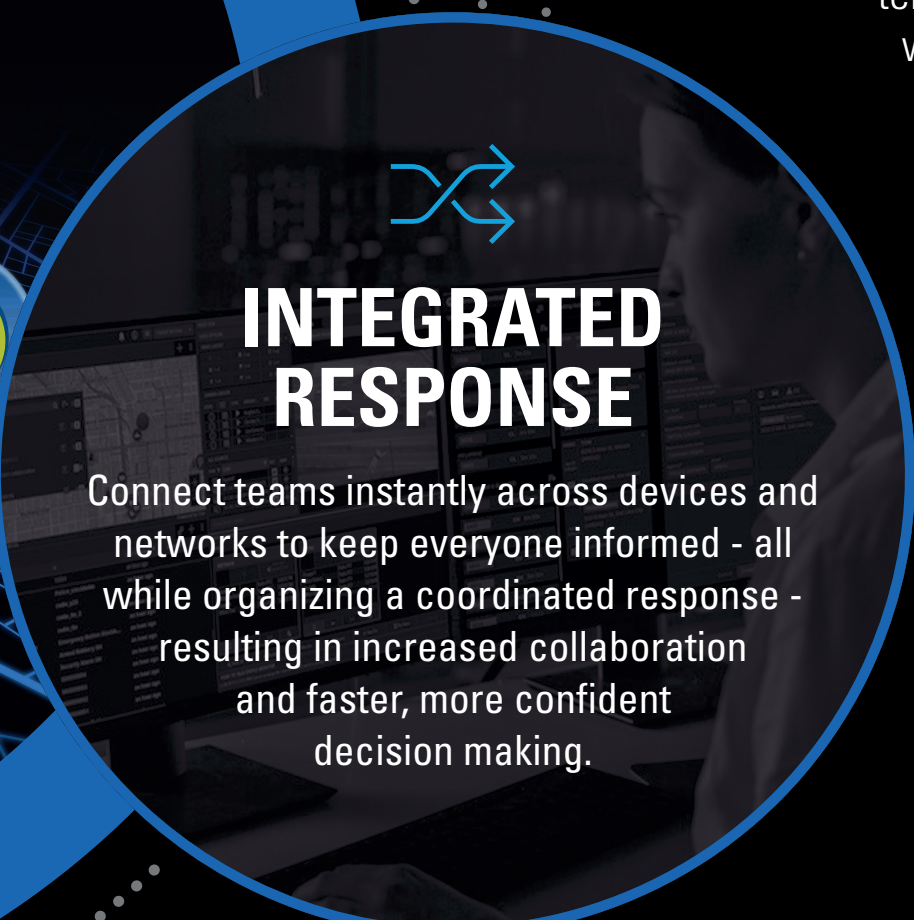

## INTUITIVE REPORTING

Capture and document incident information in real time across multiple devices, analyze incident trends using built-in reports and act on improved insights for more proactive security planning and operations.

## INTEGRATED RESPONSE

Connect teams instantly across devices and networks to keep everyone informed - all while organizing a coordinated response - resulting in increased collaboration and faster, more confident decision making.

### Avtec Scout

Dispatch and coordinate activities of security officers via radio, telephony and push-to-talk devices with a scalable, secure, reliable and proven console.

### Ally Incident Management

Automatically access and document complete, accurate data throughout your entire organization.

### WAVE PTX™ Broadband PTT

Eliminate barriers between radio users and those on broadband devices for improved productivity and greater collaboration.

**Enterprise Command Center Software** delivers public safety-grade applications to business-critical and everyday events across every stage of the workflow. Our Command Center Software delivers even greater value when deployed as part of the **Motorola Solutions unified ecosystem**.
