ADVANCED THREAT DETECTION AND RESPONSE FOR ENTERPRISE IT

CO-MANAGED 24/7 PROTECTION
Organizations are increasingly relying on mobile devices and cloud services, making it difficult for traditional network IT and security teams to keep up. With the frequency and severity of attacks increasing, organizations need the people, technology, and proven methods to swiftly recognize and respond to threats.

INCREASED VISIBILITY
Motorola Solutions bridges your security gaps through continuous monitoring of enterprise network, endpoint, and cloud activity, backed with 24/7 support from our Security Operation Center (SOC) experts.

Our managed security services prevent small threats from evolving into bigger incidents, and reduce the time required to detect, contain and eradicate problems. We focus on your security so you can focus on your business.

EXPERT ASSISTANCE
From enterprise network traffic monitoring and control to compliance reporting and tracking, we serve as an extension to your security team through our comprehensive managed services approach.

Our ActiveEye™ advanced threat detection and response platform enables you to see and correlate activity from your entire enterprise and to interact with our SOC team in real time to resolve threats quickly.

SYSTEMATIC APPROACH TO MITIGATE RISKS

- **DETECT**
  - Proactive event monitoring and automated alerts

- **ANALYZE**
  - Real-time analysis correlation

- **INVESTIGATE**
  - Incident investigation and evaluation

- **RESOLVE**
  - Complex incident resolution

- **REPORT**
  - Advanced data analytics

24% OF ORGANIZATIONS HAVE A TEAM FOR RESPONDING TO SECURITY INCIDENTS WHEN THEY HAPPEN BUT DON’T PERFORM 24/7 MONITORING.
Our security team works with your organization to make sure potential threats are detected and are resolved quickly. Armed with the tools you already use, our ActiveEye platform optimizes and scales Managed Detection and Response (MDR) capabilities across your enterprise. It eliminates the noise, allowing you to focus on the tasks that need your attention.

**DETECT ENTERPRISE NETWORK THREATS**
Get powerful threat detection capabilities across your on-premise enterprise landscape to eliminate security blind spots and mitigate unmanaged shadow IT activities. Meet compliance requirements and detect threats with NIDS, monitoring, log retention, reports, and vulnerability assessments.

**SECURE DEVICES AND ENDPOINTS**
Protect enterprise laptops, servers, mobile devices and more with threat detection, asset discovery, internal traffic analysis, and log collection. ActiveEye monitors all activity 24/7 and analyzes data in real time to automatically identify threat activity to detect and prevent advanced threats as they happen.

**PROTECT SaaS APPLICATIONS**
Whether it’s Office 365, Google G Suite, or Salesforce, ActiveEye protects assets as you move to the cloud. We combine configuration best practices with advanced analytics to give you visibility and control into the tools you use every day to drive your business.

**KEEP CLOUD INFRASTRUCTURE SAFE**
Gain visibility into your cloud infrastructure to stay productive and keep your cloud safe. Configuration assessments identify risks in your cloud. Activity monitoring alerts you to account compromise or abuse of resources.

**SEE THREAT ANALYTICS**
ActiveEye learns who and what is attacking your organization, building a threat database that analysts can add to manually as well. Advanced machine learning uses this data while profiling users to detect account takeover or insider threats.

**RESOLVE INCIDENTS QUICKLY**
ActiveEye puts a simple, intuitive investigation capability at the fingertips of even non-security experts. See all related alerts – both open and closed, along with all administrative activity on user accounts – in a single click.

**SEE KPIs AT A GLANCE**
For a team to optimize their performance, they need insights on their activities. ActiveEye captures key performance indicators (KPIs) around workload, providing the ability to meet service levels and response actions, thus enabling organizations to see at a glance how threats and resolution times are trending over time.
