

INTEGRATED WORKFLOW

THE PLATFORM

One Common Operating Picture

KNOW WHAT MATTERS, WHEN IT MATTERS

Workflows can be complex. It takes a variety of applications and tools to accomplish critical tasks, and introducing new technologies often introduces new complexities. Many times applications are outdated, have different experiences for users, and have - at best - “swivel chair” integration. Teams today are frustrated by data silos, outdated tools, and inefficient application integration, all forcing them to enter data multiple times, in multiple places, using tools that don’t look and operate the same.

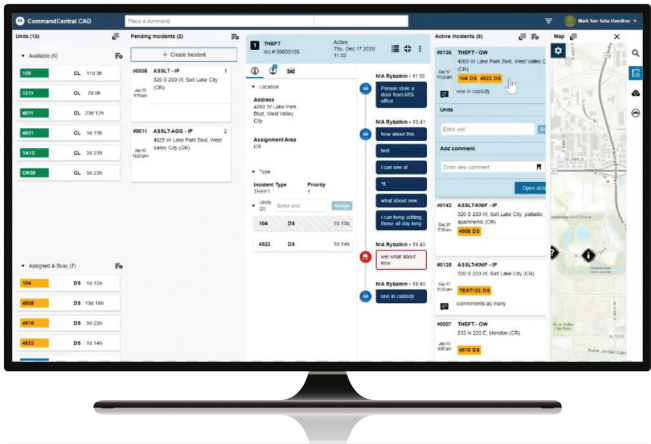

Deliver the right information to the right people at the right time with integrated workflows.

INTEGRATED WORKFLOW

Replacing these disparate, disconnected, and costly processes with one consistent system helps leverage your investments into streamlined and efficient workflows that ease frustration and save time. A unified platform with applications working together seamlessly offers a “single pane of glass” and improves response. Deliver the right information to the right people at the right time with **integrated workflows**.

OPERATIONAL CONSISTENCY, EFFICIENCY AND SECURITY

UNIFIED

SHARED DATA BETWEEN APPS

Repeatedly entering the same data wastes valuable time. Exchange relevant information with the right users at the right time, leading to more efficient operations and better outcomes.

ACTIONABLE

COMMON APPLICATION SERVICES

Inconsistency across applications increases frustration and risk. Access critical information, such as location, maps, groups and identities, within each application for consistency across operations.

SECURE

COMPLETE CONTROL OF YOUR DATA

Some things are “need-to-know” — and most people don’t need to know. Manage user permissions to search, view, share, and edit files, for the perfect balance of efficiency and security.

ACCELERATE DECISION MAKING

Many vendors provide APIs or interfaces for information to flow from one tool to the next. Motorola Solutions' integrated workflows truly eliminate the "swivel-chair integration" and provide one common operating picture for users. Through native and complete integrations across your operations, you will experience better digital interactions and maximize information flow, enabling a better response and improving safety.

Integrated workflows are just one of the benefits brought to you by the Motorola Solutions Platform. We build technology on a common Platform to unify your data and workflows on a secure foundation so you can collaborate more easily and make more informed decisions.
