Safer airports

An airport is a complex environment with multiple stakeholders including passengers, airlines, cargo companies, merchants, security, government agencies and fire departments. Ensuring safety and security for everyone, while also maintaining a comfortable environment, is vital for all parties. The Motorola Solutions safety and security ecosystem safeguards airports, both airside and landside, to support secure and efficient experiences for travelers, crews, and employees by detecting anomalies and facilitating clear communication throughout complex operations.

MOTOROLA *SOLUTIONS*

Intelligent solutions for safer and more efficient airports

Every inch of the airport, we have you covered

From passenger drop off to airplane take off, prepare your staff for challenges by connecting your critical communications, video security, access control, data and analytics with the Motorola Solutions safety and security ecosystem.

If you need help with	Our ecosystem provides
Physical site security	Unified communications and integrated technology both inside and outside, ensuring all areas are secure and monitored for potentially disruptive incidents
Staffing shortages & worker safety	Stronger, more intelligent site coverage to help protect workers conducting activities in groups or alone
Interoperability & consistent connection	Flexibility to connect between radios and networks, no matter where the work takes place
Operational efficiency	Integrated voice, video, data, analytics, and command center operations into a streamlined and easily actionable workflow
Community notification	Mass notifications and alerts to keep travelers and workers in your airports informed in any situation

Discover the technology that helps your organization tackle each challenge and turn it into a positive outcome

Intelligent site coverage

- Two-way radios for rapid, reliable communications that work with fixed video and access control for alerting, full facility coverage and seamless situational awareness

- License plate readers and video analytics to alert of trespassers, unwanted individuals or loitering, enhancing full-day security guard coverage

- Texting and polling features to get shift coverage

Safer shifts, and properties

- Panic buttons to empower staff to get help instantly from the push of a button

- Body cameras to provide transparency and an unbiased witness in the case of an incident or a disruptive passenger

- Video security to provide visibility across vast areas, identify anomalies and enable 24/7 situational awareness

- Access control to secure entry points and automatically alert when a door is propped open or breached

- AI-powered video analytics to detect banned individuals, license plates, weapons or unusual activity

- Mass notifications via text, email and voice to notify the right people with the right information at the right time

- Gas, temperature and chemical sensors that immediately alert security upon detection
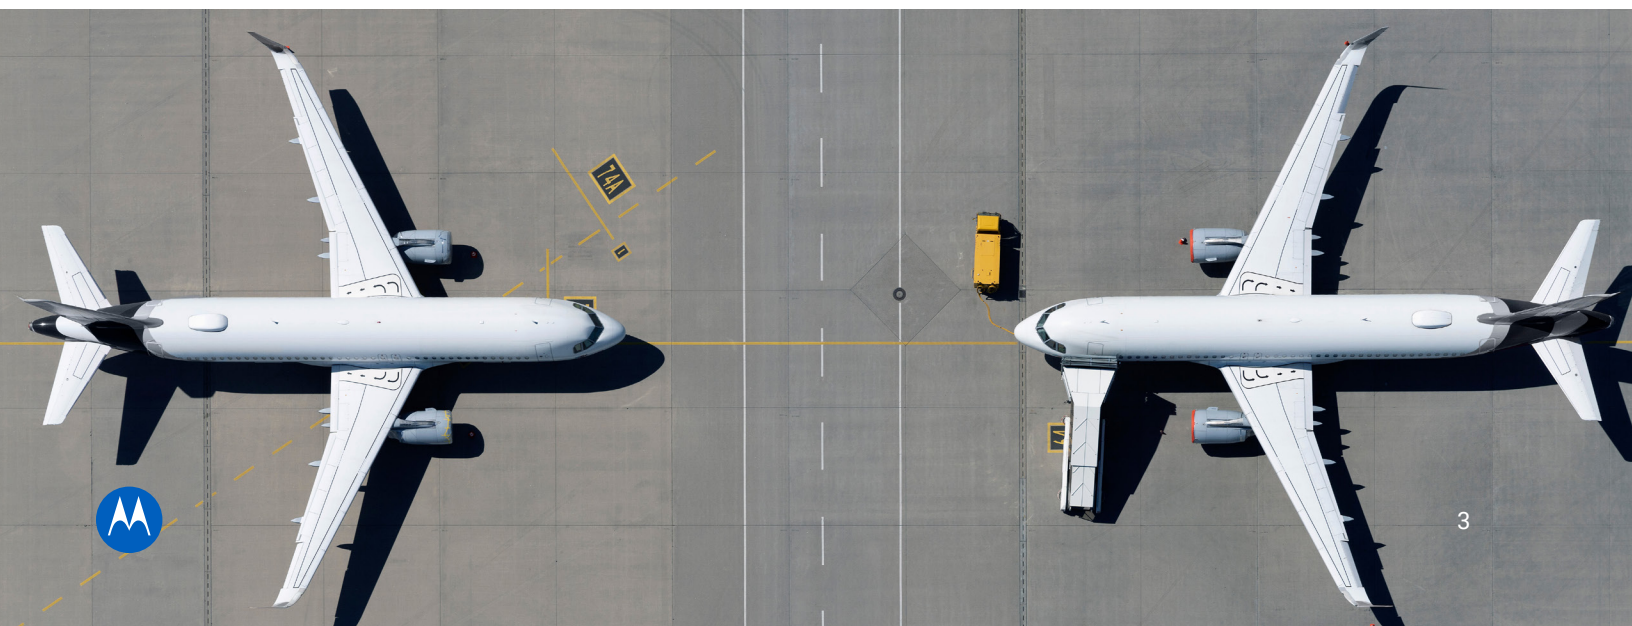

Situational intelligence

- Incident management software for proven incident and records management to enhance response and reduce risk

- Situational awareness software to remotely assist security and public safety officers when they reach the site to locate, track and map incidents

- Access control to unlock specific doors and entry points when authorities arrive on the scene

Operational efficiency and site awareness

- Video cameras and analytics to conduct regular inspections on-site and optimize maintenance schedules

- Tactical incident management, process automation and business continuity software to ensure key stakeholders follow all necessary response steps

- Targeted mass notifications to inform pre-segmented groups for upkeep, facility support, or repairs

- Body cameras to capture and share live video evidence and location in an incident on-site

Reliable and efficient alerting

- Mass notifications to instantly notify customers and community members of incidents, outage status, important announcements, or other relevant information

- Flexibility to respond quickly and notify customers to the uncertainties of extreme weather and natural disasters

- Ability to notify through voice, text, or email

3

Key ecosystem components recommended for safer airports

Video security & access control

Strengthen safety and help ensure visibility across your sites, regardless of lighting challenges, harsh weather, or other environmental conditions with integrated video security and access control systems built to secure vulnerable areas and streamline operations.

- Complete situational awareness
- Cloud versatility
- Driven by AI
- Manage from anywhere

Radio communications

Connect your team with rugged two-way radios that deliver superior voice clarity, outstanding range and long battery life, so they can hear and be heard no matter where they are or what they are doing.

- Durable and easy to use
- Pristine audio quality
- Long battery life
- Multimedia and app capabilities

Body cameras

Having an objective, unbiased witness matters. Wearing a body camera can ensure employees, from security guards to gate agents and field technicians, can capture evidence-grade video of any situation that unfolds.

- Rugged and intuitive design
- Maintain evidential integrity
- Pre and post-recording
- Immediate footage offload

Wave PTX Carrier Independent Broadband MCPTT

Connect your team with greater speed and efficiency with a push to talk over cellular service without boundaries. With heavy-duty traditional and lightweight, wearable communications options that work together, your employees can have a device to meet their needs.

- Instant PTT communication
- Multimedia messaging
- Nationwide service

Take airport safety & security
to the next level

The Motorola Solutions Safer Airports ecosystem unifies mission-critical technologies to improve safety and security across your airport facilities while also helping your operations be smarter and more efficient. By bringing together the integrated and innovative technology you need to help reduce operational downtime while maintaining efficiency and most importantly, keeping your employees and passengers safe.

Learn how Motorola Solutions can help your airport elevate safety with communication solutions that go the distance.
