Excel Macro Web ADI Settings

- Web ADI will work from your desktop by enabling the Macros and other setups as shown below. Please follow these steps carefully.
  * Go to Excel Options → Trust Center → Trust Center Settings..

*Set ActiveX setting as follows:
Excel Macro Web ADI Settings

*Set Macro setting as follows:

*Set External Contents as follows:
Excel Macro Web ADI Settings

* There is an additional step to check on Internet Explore (IE) browser settings. Open IE and click on the Internet Options.

* Following screen will come. Then navigate to “Security Tab“. Select zone as “Internet” and click on “Custom Level“:
Excel Macro Web ADI Settings

*Scroll down and then “Enable” the “Allow status bar updates via script” option.

*Click OK.
System will come back to the previous screen.
*Click on OK/Apply in that screen to close that.
