

Supplier Hierarchy Reference

HIERARCHY SUMMARY

Motorola Solutions recently updated their supplier hierarchy mapping to providing suppliers visibility to information within a hierarchy using the iSupplier portal. This update also provides consolidated and consistent reporting functionality.

User View	Parent Relationship	Child Relationship
iSupplier	<ul style="list-style-type: none">Suppliers can view all Children and Parent Purchase Order (POs)	<ul style="list-style-type: none">Suppliers can only view the Child PO's at child level.
Collaborative Planning	<ul style="list-style-type: none">Suppliers are able to view demand at Parent levelNo Hierarchy ViewNo Concept of Parent or Child level	<ul style="list-style-type: none">Attached to only specific (e.g. company, site, etc.) from parent levelSuppliers can only perform tasks at assigned Child level
Sourcing	<ul style="list-style-type: none">Run sourcing event, accept sourcing event levels at Parent level	<ul style="list-style-type: none">Attached to only specific (e.g. company, site, etc.) from parent levelSuppliers can only perform tasks at assigned Child level
