ASN: Packing List & COO Validation

09-November-2017

ASN: Packing List & COO Validation

- There is an expectation that each ASN created by supplier has the same Packing List at ASN Header and ASN Line(s).
- Country Of Origin (COO) at ASN Header should also match COO at Line Level.
- A validation has been put in place during ASN creation to ensure these values match between ASN Header and Line.
- If there is a different Packing List for your shipments, do create a separate ASN.

ASN: Packing List & COO Validation

ASN Packing List & COO Validation

- If there is a mismatch between Header a Line Level -> You will not be able to Submit for ASN Creation.

ASN: Packing List & COO Validation

- ASN Upload Template will highlight when Packing List differs between Header Section and Line Section

The screenshot shows a Microsoft Excel spreadsheet titled "ASN_Template - Microsoft Excel". The spreadsheet is divided into sections: "HEADER_SECTION" (rows 1-2) and "LINE_SECTION" (rows 3-5). The "HEADER_SECTION" includes fields for "Shipment Number*", "Shipment Date*", "Expected Receipt Date*", "Bill of Lading", "Packing Slip*", "Freight Carrier", "Number of Containers", "Waybill Number", "Gross weight UOM", "Gross weight", and "Tar weight". The "LINE_SECTION" includes fields for "Organization*", "PO Number*", "Revision Number*", "Release Number", "Line Number*", "PO Shipment Num", "Quantity*", "UOM*", "Bill of Lading", "Packing Slip*", and "Country of Origin*".

A warning dialog box is displayed in the foreground, titled "Microsoft Excel". The message reads: "Warning- Line Level Packing Slip not equal to Shipment Header Packing Slip". The dialog box has an "OK" button.

Additional annotations in the spreadsheet include a red box around cell D1 containing the text "Validate ASN data" and a yellow box around cell F1 containing the text "Save as a Text (Tab Delimited) File before upload".
