

VB400 26.1 Release Note

Software updated in V26.1

- VB400 Firmware

Changes since V25.3.1

New Features

Issue ID	Feature name	Summary
VB400-1869	Audio only mode	The VB400 body worn camera can now capture audio only recordings by performing a gesture on the device.
VB400-2457	Security enhancements	Essential security enhancements have been applied to the VB400 camera firmware, and to enhance the communication channel to VideoManager. System libraries have also been updated to apply security updates.

Minor enhancements

Issue ID	Summary
VB400-2458	GNSS location data will be shared with VideoManager only when a recording is performed on the device.
VB400-2428	The VB400 camera shall now provide a log entry when a button has been pressed on the camera, if it is configured to do so.
VB400-302	VB400 devices connected via Wi-Fi now correctly display their specific network location in VideoManager.
