

# COUNTDOWN TO NARROWBANDING

**PREPARE YOUR TWO-WAY RADIOS NOW**

## TIME'S TICKING: ARE YOU NARROWBAND COMPLIANT?

As technology advances, demand on radio frequency spectrum continues to increase. To promote more efficient use of the spectrum, the Ministry of Economic Development has mandated that VHF/UHF/800MHz two-way radio licensees migrate to 12.5kHz channel bandwidths.

**YOU ARE REQUIRED TO USE 12.5KHZ EFFICIENCY RADIOS BY 1 NOVEMBER 2015**

### WHY ARE YOU TELLING ME THIS NOW?

We would like to give you advance notice of this mandate to ensure your business is compliant and that your two-way radios continue to work beyond 1 November 2015. The good news is, if you have Motorola Solutions' two-way radios, your equipment may not need to be upgraded.

### WHAT YOU NEED TO DO:

- Where possible, disable the 25kHz mode on two-way radio equipment
- Replace two-way radio equipment only capable of operating at 25kHz
- For full details on the Ministry of Economic Development's Narrowband mandate visit: [www.rsm.govt.nz/online-services-resources/faqs/licences](http://www.rsm.govt.nz/online-services-resources/faqs/licences)

If your business does need to upgrade equipment, we can help plan a smooth and cost-effective transition. To ensure you are ready on time, contact your authorised Motorola Solutions Channel Partner to arrange a Narrowband compliance check.

As a trusted leader in two-way communications, Motorola Solutions has been preparing 12.5kHz radio technology for over a decade and can help you prepare for a smooth and cost-effective transition to Narrowbanding.

### TIME'S TICKING!

For Narrowbanding assistance, contact your authorised Motorola Solutions Channel Partner.

**NEED NARROWBANDING HELP?** Arrange an audit of your two-way radio equipment today.
