

Orchestrate + Avigilon Alta Access: Automate and streamline security

In critical situations, every second counts. Maintaining situational awareness is critical. Avigilon Alta Access triggers automated workflows through Orchestrate when an access control event occurs, creating more secure spaces.

Benefits

Increased situational awareness | Automatic monitoring | Immediate incident response

Example workflow

Integration outcomes

In moments of uncertainty, getting the right information to the right people at the right time is critical.

- **Increased staff efficiency:** monitor access points without the need for physical staff, maximizing resources.
- **Automated response:** configure workflows that are instantly triggered when an access control event occurs.
- **Enhanced response time:** receive instantaneous notification of a security breach, allowing for swifter response.
- **Real-time visibility:** utilize analytics capabilities for a more coordinated, efficient response.
- **Operational flexibility:** manage your technology anywhere, any time with a completely cloud-based platform.

How to connect

In moments of uncertainty, getting the right information to the right people at the right time is critical.

- Alta Access hardware and software
- Current Orchestrate software

Orchestrate + Avigilon Alta Video: Automate and streamline security

In critical situations, every second counts. Maintaining visibility is vital when an incident occurs. Orchestrate allows triggers to be provided and actions taken automatically for better situational awareness, in any event.

Benefits

Greater incident insights | Improve operational awareness | Manage anywhere

Example workflow

Integration outcomes

In moments of uncertainty, getting the right information to the right people at the right time is critical.

- **Reduced response time:** address situations faster with instant incident notification.
- **Increased operational efficiency:** optimize personnel by gaining greater visibility into your operation.
- **Scalable and flexible:** ensure long-term viability by scaling up as your organization grows.
- **Data-driven insights:** receive data after an incident for improved response every time.
- **Communicate effectively:** get eyes on the scene and update as an incident unfolds.

How to connect

Technical requirements

- Avigilon Alta Video subscription
- Avigilon Alta cameras or third party cameras/sensors with an Avigilon Alta Cloud Connector
- Current Orchestrate software

Orchestrate + Avigilon Unity Video Client: Automate and streamline security

In critical situations, every second counts. Notifying the right personnel quickly is essential. When a workflow is initiated in Orchestrate, the Avigilon Unity Video Client software provides actions like emails, voice calls and 3rd party applications to inform teams faster.

Benefits

Enhanced situational awareness | Increased visibility | Coordinated response

Example workflow

Integration outcomes

In moments of uncertainty, getting the right information to the right people at the right time is critical.

- **Efficient response:** immediately inform critical personnel as a situation unfolds.
- **Real-time visibility:** coordinate an effective response by keeping eyes on the scene.
- **Proactive security planning:** create predetermined workflows for anticipated security events.
- **Unified operation:** connect across your security ecosystem for a more robust response.
- **Flexible and scalable:** adapt workflows as your organization's needs grow and change.

Technical requirements

- Avigilon Unity Video server connected to Avigilon Unity Cloud Services
- Current Orchestrate software

Orchestrate + Avigilon Decision Management System: Automate and streamline security

In critical situations, every second counts. It's vital for incidents to be managed effectively. Avigilon Decision Management System provides triggers and actions for automated workflows in Orchestrate to create safer, more secure spaces.

Benefits

Streamlined decision making | Effortless reporting | Consistent response

Example workflow

Integration outcomes

In moments of uncertainty, getting the right information to the right people at the right time is critical.

- **Efficient decision making:** unify your security operation and make decisions faster.
- **Reduced human error:** automate security processes for a more coordinated response.
- **Instant reporting:** log and update incident information effortlessly from start to finish.
- **Minimized risk:** audit incident reports at any time and simplify compliance management.
- **Improved response:** identify security patterns and strengthen response protocols.

How to connect

Technical requirements

- DMS hardware and software
- Current Orchestrate software

Orchestrate + MOTOTRBO: Automate and streamline security

In critical situations, every second counts. Responding efficiently is vital. MOTOTRBO radios can trigger workflows in Orchestrate when an emergency alert is activated, helping create more secure spaces.

Benefits

Streamline response | Improve situational awareness | Flexible and scalable

Example workflow

Integration outcomes

In moments of uncertainty, getting the right information to the right people at the right time is critical.

- **Rapid response:** automated workflows allow for incidents to be addressed the moment they occur.
- **Real-time visibility:** gain insight into a situation with continued communication to improve situational awareness.
- **Peace of mind:** receive an alert when a worker calls for help, their radio detects they have fallen or there is a potential issue with a lone worker.
- **Operational flexibility:** manage your security operation anywhere, any time with Orchestrate's cloud-based platform.
- **Threat prevention:** create workflows for anticipated security scenarios ahead of time and reduce threat escalation.

Technical requirements

- MOTOTRBO IP Site Connect, Capacity Plus or Capacity Max system
- MOTOTRBO portable or mobile radios
- Motorola Edge Node
- Current Orchestrate software

Orchestrate + P25 Text Messaging: Automate and streamline security

In critical situations, every second counts. Communicating effectively is vital. P25 text messaging delivers messages over an ASTRO radio system when a workflow is triggered in Orchestrate, creating a stronger incident response.

Benefits

React faster | Increase operational efficiency | Coordinate response

Example workflow

Integration outcomes

In moments of uncertainty, getting the right information to the right people at the right time is critical.

- **Cross-functional collaboration:** coordinate response between security personnel and public safety officers.
- **Immediate notification:** respond the moment a situation is identified with automated workflows, saving precious time.
- **Streamlined response:** connect your security operation to address incidents more efficiently and seamlessly.
- **Real-time visibility:** receive live updates as an incident unfolds so you can react safely and strategically.
- **Operational flexibility:** manage your security operation from anywhere, at any time with a fully cloud-based platform.

Where and how to connect

Technical requirements

- APX radios with text messaging capabilities
- ASTRO radio system enabled with IV&D and ASTRO messaging service
- Critical Connect Data
- Current Orchestrate software

Orchestrate + Rave Alert: Automate and streamline security

In critical situations, every second counts. Delays in communication can have serious consequences. Orchestrate triggers instant notifications through Rave Alert, ensuring that the right information reaches the right people at the right time.

Benefits

Faster response time | Flexible and scalable | Enhanced situational awareness

Example workflow

Integration outcomes

In moments of uncertainty, getting the right information to the right people at the right time is critical.

- **Proactive threat mitigation:** identify and address threats before escalation, minimizing risk.
- **Enhanced situational awareness:** gain a unified view of events for faster, informed decisions.
- **Improved communication:** instant notifications ensure the right information reaches the right people.
- **Streamlined automation:** automate tasks, freeing up personnel for strategic focus.
- **Faster response:** real-time insights empower swift action to security threats.

How to connect

Technical requirements

- Rave Alert
- Set up Common Alerting Protocols
- Current Orchestrate Software version

Orchestrate + Rave Panic Button: Automate and streamline security

In critical situations, every second counts. Efficient communication during an emergency is paramount. Rave Panic Button triggers automated workflows in Orchestrate when an emergency scenario is activated, getting help to those in need faster.

Benefits

Faster response time | Increased efficiency | Improved communication and collaboration

Example workflow

Integration outcomes

In moments of uncertainty, getting the right information to the right people at the right time is critical.

- **Enhanced response:** launch custom workflows and notifications based on event type.
- **Streamlined processes:** eliminate delays caused by manual processes, leading to quicker dispatch of help.
- **Improved insights:** gather data on incidents as they occur and coordinate personnel for a stronger response.
- **Flexible and scalable:** customize your security operations as your needs change, ensuring long-term viability.
- **Effective communication:** connect first responders, on-site personnel and other key stakeholders seamlessly.

Technical requirements

- Rave Panic Button
- Current Orchestrate software

Integration Blueprint

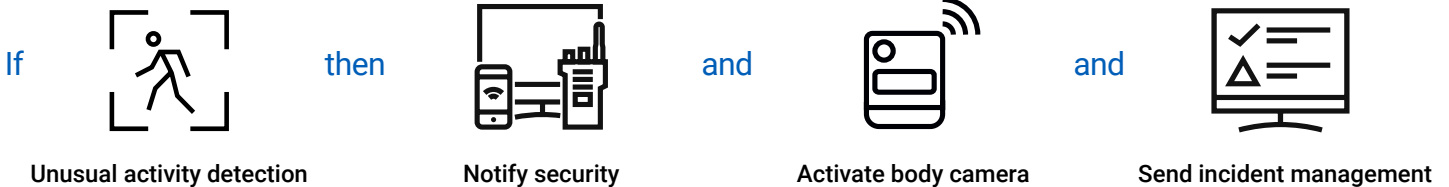

Orchestrate + VB400 + MOTOTRBO + Avigilon Unity Video: Automate and streamline security

In critical situations, every second counts. Gathering real-time information is vital. When MOTOTRBO radios are combined with the VB400 body camera and Avigilon Unity Video software, workflows can be automatically triggered in Orchestrate for a more efficient incident response.

Benefits

Improve response time | Streamline workflows | Enable real-time intelligence

Example workflow

Integration outcomes

In moments of uncertainty, getting the right information to the right people at the right time is critical.

- **Reduced response time:** receive alerts the moment a situation occurs to act faster.
- **Improved situational awareness:** collect real-time information from your body camera and contextual information from your fixed cameras.
- **Efficiently captured intelligence:** enable automated workflows to collect intelligence instantly and address potential issues.
- **Enhanced communication:** alert colleagues when duress is occurring with the press of a button.
- **Unified security operations:** connect your technology ecosystem for a stronger response all in one platform.

Where and how to connect

Technical requirements

- VB400 body camera
- VideoManager Software (Q2 2022 onwards)
- MOTOTRBO system and portables
- Edge Node with MNIS data software
- Virtual server running CloudConnect server with connector services (VMS-Poller/Avigilon connector)
- Proxy server hosting SDKs
- Current Orchestrate software

 Automate with Orchestrate

Orchestrate + VehicleManager Enterprise: Automate and streamline security

In critical situations, every second counts. Immediately identifying a threat is vital. VehicleManager Enterprise license plate recognition software triggers automated workflows in Orchestrate when a flagged plate is identified, creating more secure spaces.

Benefits

Improve response time | Real-time visibility | Unify operations

Example workflow

Integration outcomes

In moments of uncertainty, getting the right information to the right people at the right time is critical.

- **Instant response:** set a workflow in motion the moment certain vehicles are detected.
- **Threat deterrence:** enable 24/7 security and enhance safety by lowering the likelihood of threats.
- **Simplified operations:** manage your security operations in one cloud-based platform anywhere, any time.
- **Improved situational awareness:** collect data in real-time and share with law enforcement to respond effectively.
- **Flexible and scalable:** adjust as your operation grows and changes with completely customizable workflows.

How to connect

Technical requirements

- LPR camera system
- Wired or wireless interface
- Current Orchestrate software

Orchestrate + WAVE PTX: Automate and streamline security

In critical situations, every second counts. Communicating effectively is vital. When a workflow is triggered through Orchestrate, automatic notifications can be sent from the WAVE PTX mobile application to keep individuals informed.

Benefits

Streamlined operations | Improved situational awareness | Faster response

Example workflow

Integration outcomes

In moments of uncertainty, getting the right information to the right people at the right time is critical.

- **Unified communication:** instantly receive alerts regardless of location or broadband network.
- **Improved response time:** enable automatic workflows to address situations faster, for a more secure operation.
- **Increased staff efficiency:** communicate with personnel in real-time to better allocate resources.
- **Operational flexibility:** notify staff on iOS or Android devices, meeting the unique needs of your organization.
- **Easily managed:** access Orchestrate from anywhere, at any time with its cloud-based platform.

Technical requirements

- WAVE PTX subscription
- WAVE PTX app installed on devices with subscription or TLK two-way radio
- Current Orchestrate software

Orchestrate + Avigilon Unity Access: Automate and streamline security

In critical situations, every second counts. Staying informed as access events unfold is paramount. When a trigger is initiated in Orchestrate, Avigilon Unity Access automatically controls wireless locks, visitor management systems and more to keep facilities safe.

Benefits

Security at scale | Faster response | Reliable monitoring

Example workflow

Integration outcomes

In moments of uncertainty, getting the right information to the right people at the right time is critical.

- **Streamlined operations:** automatically grant or refuse access to facilities, saving precious time.
- **Total visibility:** receive immediate notifications when a breach occurs for a faster response.
- **Proactive threat prevention:** configure automated workflows before escalation, minimizing risk.
- **Operational flexibility:** manage your operation anywhere, anytime with a completely cloud-based platform.
- **Respond effectively:** connect your security operations end-to-end for a more efficient response.

How to connect

In moments of uncertainty, getting the right information to the right people at the right time is critical.

- Unity Access 7.8 or greater
- 1 unused Webhook license (included with Unity Access base software)
- Current Orchestrate software

Orchestrate + Curve: Automate and streamline security

In critical situations, every second counts. Effective communication is paramount. Orchestrate triggers notification through Curve radios, connecting teams and empowering them to respond faster.

Benefits

Streamlined decision making | Faster response | Minimized risk

Example workflow

Integration outcomes

In moments of uncertainty, getting the right information to the right people at the right time is critical.

- **Prevent escalation:** address potential security risks before they escalate, protecting both personnel and those they serve.
- **Optimize personnel:** reduce the need for extra dedicated security personnel and maximize resources.
- **Reduce response time:** notify security the moment an event occurs and take action faster.
- **Maintain accountability:** keep eyes on scene with improved communication channels.
- **Flexible and scalable:** build workflows unique to your organization and update them as you grow.
