

USE CASE FIRE & EVACUATION

Safe Manufacturing

Operational View

DETECT

FIRE DETECTED

An alarm detects a fire or substance leak and security and operations are automatically alerted on their device of choice and in the command center.

ANALYZE

SITUATION ANALYZED

Security quickly assesses relevant video for situational awareness and can monitor the plant through all relevant feeds as employees evacuate based on protocols.

COMMUNICATE

NOTIFICATIONS COMMUNICATED

Response teams are dispatched according to safety protocols. Mass communication sent to all employees to evacuate.

RESPOND

INCIDENT MANAGED & REPORTED

Appropriate authorities and fire teams are engaged. Access Control Manager (ACM) Verify confirms employee and visitor location during mustering. Incident report logged for further analysis and investigation.
