The new Avigilon H5 Pro camera captures the best-in-class image details over vast areas, providing maximum coverage options through our most powerful and innovative ultra high definition cameras yet. Avigilon's 10K HD Pro camera is the security industry's first single-sensor 10K (61 megapixel) camera. It delivers stunning image detail, simultaneously providing maximum scene coverage, while minimizing bandwidth and storage consumption through our patented High Definition Stream Management™ (HDSM) 2.0 technology. HDSM™ 2.0 patented technology drastically reduces server-client bandwidth requirements and makes optimal use of computing and storage resources.

With the high resolution, a single H5 Pro has the ability to do the job that multiple cameras would normally achieve. Budget-sensitive projects can also take advantage of the camera's optimal low light performance and still gain the benefits of this camera by deploying a lower resolution H5 Pro to suit smaller projects, such as a small storefront.

## Features

### NEXT-GENERATION VIDEO ANALYTICS\*

Detects more objects with expanded object classifications and greater accuracy for faster responses, even in crowded scenes.

### FOCUS OF ATTENTION WITH ACC™ 7

Leverages AI and video analytics technologies to determine what information is important and should be presented to security operators.

### H.264 AND H.265 WITH HDSM SMARTCODEC™ TECHNOLOGY

Optimizes compression levels for regions in a scene to help maximize bandwidth savings, helping to keep internet connectivity costs down.

### MADE IN NORTH AMERICA AND 5 YEAR WARRANTY

Manufactured in North America\* using globally-sourced materials and North American expertise, Avigilon stands behind the quality of its products. Backed by a 5 year warranty.

### TRUE WIDE DYNAMIC RANGE

Available in all resolutions, capture details in scenes with both very bright and dark areas.

### LIGHTCATCHER™ TECHNOLOGY

Offers exceptional detail in areas with low lighting.

### ONVIF® COMPLIANT

Built on an open platform with ONVIF S compliance to allow integration with other security solutions.

### MULTIPLE LENS OPTIONS

Choose from various lens types, including long zoom, for flexible coverage options.

ONVIF is a trademark of Onvif, Inc.

\* Analytics supported on 8, 16, and 26 MP models.  
26 MP cameras must have Full Feature mode enabled for analytics.

\* With manufacturing facilities in both the United States and Canada, our "Made In North America" claim only applies to products from our Plano, Texas and Richmond, British Columbia facilities.

# Analytics Specifications

<b>SUPPORTED ANALYTICS EVENTS</b>		
Objects in Area		The event is triggered when the selected object type moves into the region of interest.
Object Loitering		The event is triggered when the selected object type moves into the region of interest and then stays for an extended amount of time.
Objects Crossing Beam		The event is triggered when the specified number of objects have crossed the directional beam that is configured over the camera's field of view. The beam can be unidirectional or bidirectional.
Object Appears or Enters Area		The event is triggered by each object that enters the region of interest. This event can be used to count objects.
Object Not Present in Area		The event is triggered when no objects are present in the region of interest.
Objects Enter Area		The event is triggered when the specified number of objects have entered the region of interest.
Objects Leave Area		The event is triggered when the specified number of objects have left the region of interest.
Object Stops in Area		The event is triggered when an object moves into a region of interest and then stops moving for the specified threshold time.
Direction Violated		The event is triggered when an object moves in the prohibited direction of travel.

<b>SUPPORTED CLASSIFIED OBJECT TYPES</b>		
Object Types in Outdoor Mode		Vehicle, sub-types: Car, Truck, Bicycle, Motorcycle, Bus Person
Object Types in Indoor Mode		Person

<b>TEACH BY EXAMPLE</b>		
Teach By Example		Yes, when used with Avigilon Control Center™

<b>AVIGILON CONTROL CENTER (ACC) VERSIONS SUPPORTED FEATURES</b>		
ACC Version 6.14.12 or higher		All supported analytic events with two types of classified objects: person or vehicle. Appearance search when paired with appropriate server hardware. H.265 supported.
ACC Version 7.2 or higher		All supported analytic events with people and vehicles and all vehicle sub-types as classified objects. Appearance search when paired with appropriate server hardware. H.265 supported.
ACC Version 7.10.4 or higher		Improved support for decoding performance for multiple H5 Pro cameras on the ACC Client.
