

USE CASE WORKER DOWN

Safe Manufacturing

Operational View

DETECT

WORKER DOWN ALERT

Man Down feature on radio detects a fallen worker in remote area of the plant and automatically sends an alert over the radio network to security and operations.

ANALYZE

REAL-TIME VIDEO VERIFICATION

Control room operator receives the emergency alert, verifies the location of the worker and uses live video to evaluate and monitor the circumstances of the incident.

COMMUNICATE

NOTIFICATION COMMUNICATED

Based on defined protocols, the plant emergency response team is dispatched to assist the worker and investigate using real-time location data.

RESPOND

FIRST RESPONSE DISPATCHED

On-site or local first responders arrive to provide medical attention. An incident is logged with pre-populated fields and relevant data for analysis and claims
