

USE CASE

BE ON THE LOOK OUT (BOLO)

Safer Manufacturing

Operational View

DETECT

LICENSE PLATE RECOGNIZED

Using an existing database, an automatic license plate reader recognizes an ex-employee's vehicle entering the factory parking lot and alerts plant security.

ANALYZE

APPEARANCE DETECTED & ALERT TRIGGERED

Using a watch list of known individuals, the individual is automatically located approaching the facility and identified as the ex-employee. Security automatically monitors the intruder's movements over multiple cameras.

COMMUNICATE

NOTIFICATION COMMUNICATED

Security personnel are notified and dispatched with an image and the location of the intruder. Field security intercepts the individual before reaching the plant entrance.

RESPOND

INCIDENT MANAGED & REPORTED

Security incident is logged with relevant data allowing for further training & analysis.
