USE CASE
FIRE & EVACUATION
Safe Manufacturing

Operational View

DETECT
FIRE DETECTED
An alarm detects a fire or substance leak and security and operations are automatically alerted on their device of choice and in the command center.

ANALYZE
SITUATION ANALYZED
Security quickly assesses relevant video for situational awareness and can monitor the plant through all relevant feeds as employees evacuate based on protocols.

COMMUNICATE
NOTIFICATIONS COMMUNICATED
Response teams are dispatched according to safety protocols. Mass communication sent to all employees to evacuate.

RESPOND
INCIDENT MANAGED & REPORTED
Appropriate authorities and fire teams are engaged. Avigilon Unity Access (ACM) Verify confirms employee and visitor location during mustering. Incident report logged for further analysis and investigation.
