Investment thesis

Revenue growth

- Half of revenue now video, software, unmanned systems and recurring services
- Cloud, SaaS and AI revenue growing rapidly
- Increased demand for drones and unmanned systems driving growth in defense verticals

Operating margin expansion

- Customers investing in more feature rich solutions
- Growing cloud and SaaS contribution
- Continued operating leverage

Cash flow generation

- Durable cash flows driven by recurring and reoccurring revenue
- 12% CAGR growth in annual free cash flow since 2015
- Strong cash conversion

Prudent capital deployment

- Strong balance sheet and durable cash flows drive capital allocation framework
- Reduced outstanding shares by 51% since 2011*
- \$11B+** in accretive acquisitions since 2015

Video Security & Access Control

Our video security and access control systems, powered by AI, can alert you when action is needed, focusing human attention to help cover more ground and act with more certainty.

Current environment

- ~5.5M fixed cameras across 300k+ installations
- Less than 20% of events are detected after the first 20 minutes of live monitoring by a person ⁽¹⁾
- 100TB of body-worn video per month in a large city, 90% of citizens prefer use of body cameras ⁽²⁾

Our approach

More than just cameras and footage, our video solutions combine computer vision with AI, helping to recognize what's important and what's not.

Our Vision: To transform passive video monitoring into active intelligence.

(1) Motorola Solutions Research & Study
(2) LAPD CompStat Division

Video Security & Access Control

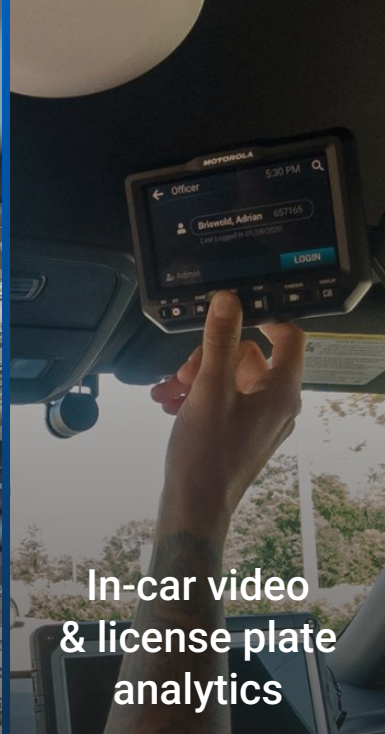

Fixed video security

Embedded AI locates persons or vehicles, anomaly detection flags unusual motion

Access control management

Video, biometrics, weapons detection, card readers in one enterprise system

In-car video & license plate analytics

In-car, body and fixed cameras connect for a 360° view, and license plate analytics help find vehicles of interest

Body cameras

Radios automate camera activation, send alerts, stream incident video

Drone as First Responder

Drone as First Responder capabilities integrated into 911 command centers

Video Security & Access Control Portfolio

Fixed Video & Access Control

- Avigilon Unity on-prem suite
- Avigilon Alta cloud suite
- Specialized cameras
- Specialty sensors
- AI remote video monitoring
- AI-powered analytics

Mobile Video

- Body cameras
- In-car cameras
- License plate recognition solutions and services
- AI-powered analytics
- Video Management
- Drone as First Responder

Purpose-built solutions for both government and enterprise that can enable public-private information sharing and collaboration to better inform and accelerate response.

~50% of total video sales in government & public safety, education and healthcare

SVX Body-worn assistant with Assist ✦

- Enhances APX NEXT family as a body-worn assistant, converging secure voice, video and AI
- Eliminates the need for a separate body camera
- Enables multi-source data for evidence, with dual audio and video streams
- Records superior radio audio, with AI-powered noise suppression
- Records body camera video, audio and ambient sound, for an objective record of everything an officer sees and hears
- Enables live translation
- FedRAMP High authorized

Video Security & Access Control

Growth and Monetization

- \$2.1B in sales growing double digits in \$37B TAM
- ~5.5M fixed video cameras deployed across 300K+ sites
- Over 90% of our fixed video camera portfolio has embedded AI capabilities
- Broad on-prem and cloud fixed video portfolio with global go-to-market reach provides competitive advantage
- Integration opportunities for remote video monitoring
- Integrations enable requests for drone aerial support from the command center or APX NEXT emergency button
- Leveraging existing government and public safety relationships in the U.S. and internationally

10% - 11% Sales Growth in 2026

Mission Critical Networks

Our critical communications devices and networks are designed for the harshest conditions, helping you stay connected and communicate with clarity when it matters most - from everyday routines to a crisis unfolding.

Current environment

- When disaster strikes, cellular networks can fail or get overloaded - Hurricanes Helene and Milton, Los Angeles wildfires
- ~13K+ LMR networks globally, 50+ nationwide & statewide systems
- Growing demand for infrastructureless video and high-bandwidth data in challenging or contested environments

Our approach

Secure and resilient communications through LMR and mobile ad-hoc networks ("MANET") can unify voice and multimedia collaboration for critical events

Mission Critical Networks

Public safety

P25 and TETRA highly survivable networks and devices, total control of coverage, capacity, maintenance, complemented with broadband connectivity

Enterprise

PCR networks and devices protect sensitive communications and shield enterprise data

Defense

MANET secure data, video and voice communications without the need for fixed infrastructure

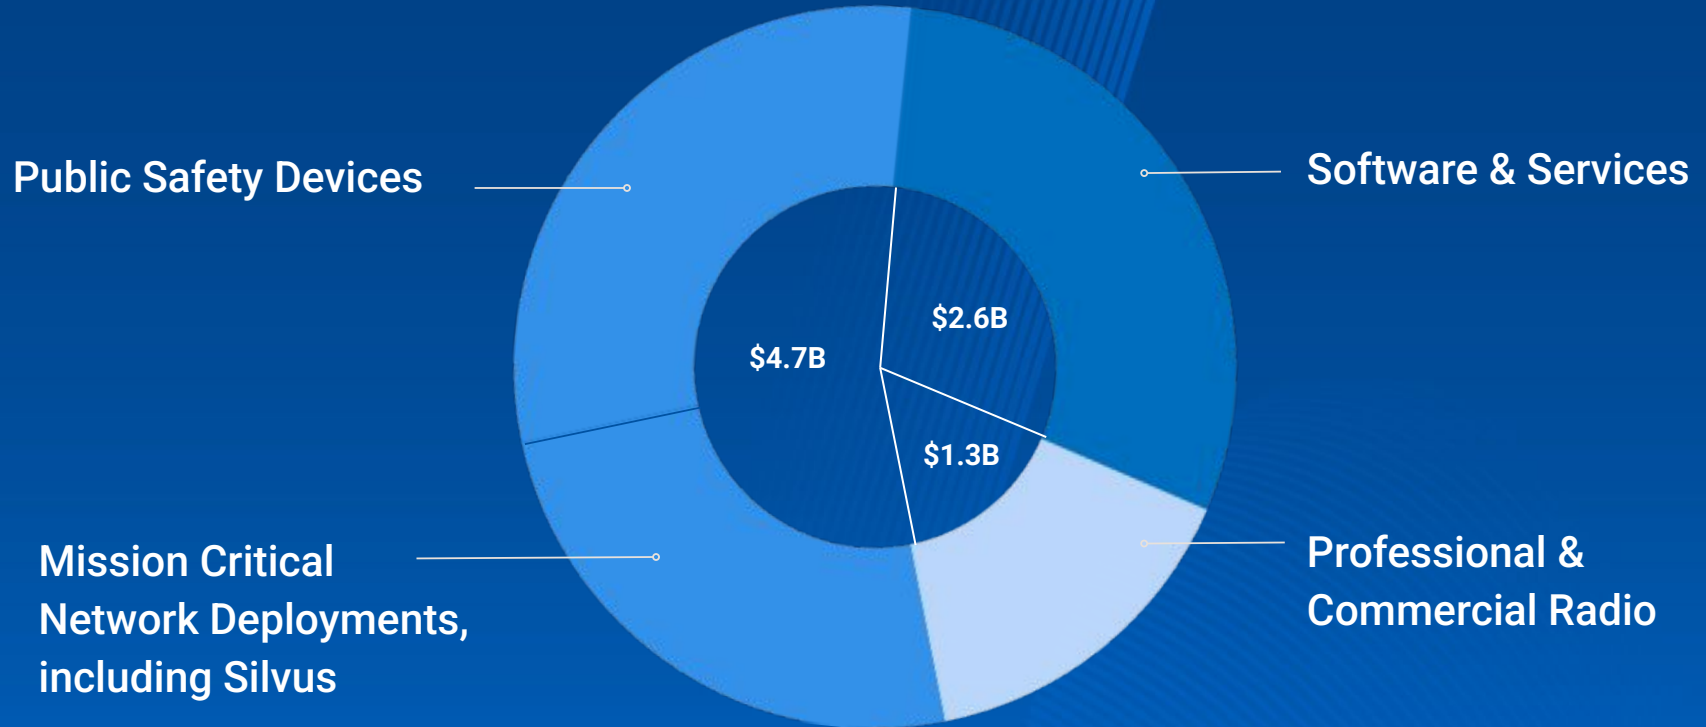

Software & services

Strong adoption for managed services, software upgrades, remote monitoring and cybersecurity; serving 4M end users

Mission Critical Networks

2025
\$8.6B Revenue*

Silvus overview

Includes high-speed MANET technology to Motorola Solutions' safety and security ecosystem, enabling highly secure data, video and voice communications without the need for fixed infrastructure

Unmanned Systems

Connects unmanned aerial, ground and naval systems for U.S., NATO and other allied nations

U.S. Department of Defense

Provides a rapidly deployable battlefield mesh data network for command and control

International Defense

Provides protected communications for manned/unmanned teaming in congested and contested spectrum environments

Border Security

Backhauls video and other sensor data from remote surveillance towers to security operations centers

Wildfire Response

Streams high-fidelity aerial video and mapping data to front line personnel battling America's biggest wildfires

Law Enforcement

Used by leading law enforcement agencies to create tactical bubbles to share video and data for large scale public safety events

Mission Critical Networks

Growth and Monetization

- ~13k+ LMR networks globally, 50+ nationwide & statewide systems
- Networks monetized with recurring services and devices replaced every 7-8 years
- Multi-year services agreements expanding to higher value offerings: software upgrades, cybersecurity, remote monitoring
- Customers with unique requirements & high expectations for 'always-on' performance provides a competitive advantage
- Worldwide network of channel partners to amplify market reach and penetration
- Silvus high-speed MANET for fast growing new defense and unmanned systems market

8% - 9% Sales Growth in 2026

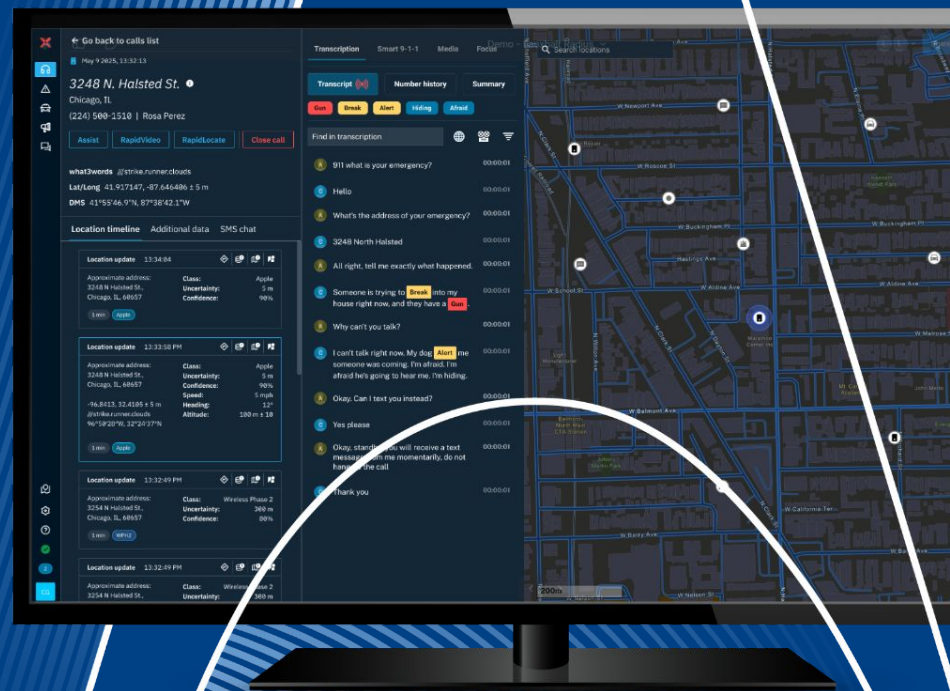

J. AHERN

Command Center

Our command center technologies can bring voice, video and data into a single view to help simplify workflows and provide the overarching perspective to make decisions with greater focus, accuracy and speed.

Current environment

- ~60% of the ~6K 911 centers in the U.S. use at least one of our software solutions
- 10k more lives could be saved each year if 911 could get to callers one minute faster ⁽¹⁾
- ~40% of a call handler's time on 911 calls is spent verifying information⁽²⁾
- Officers spend ~40% of their shift behind a keyboard rather than in the community⁽²⁾

Our approach

Software solutions that support the complex process of the public safety workflow from "911 call to case closure."

(1) FCC "Wireless E911 Location Accuracy, Fifth Report and Order," 2019

(2) Motorola Solutions customer research 2026

Command Center

Detection

Community tipping, mass notification, panic buttons and 911 call handling & routing

Response

Dispatch & coordination, real-time intelligence & collaboration, field reporting and broadband enabled solutions

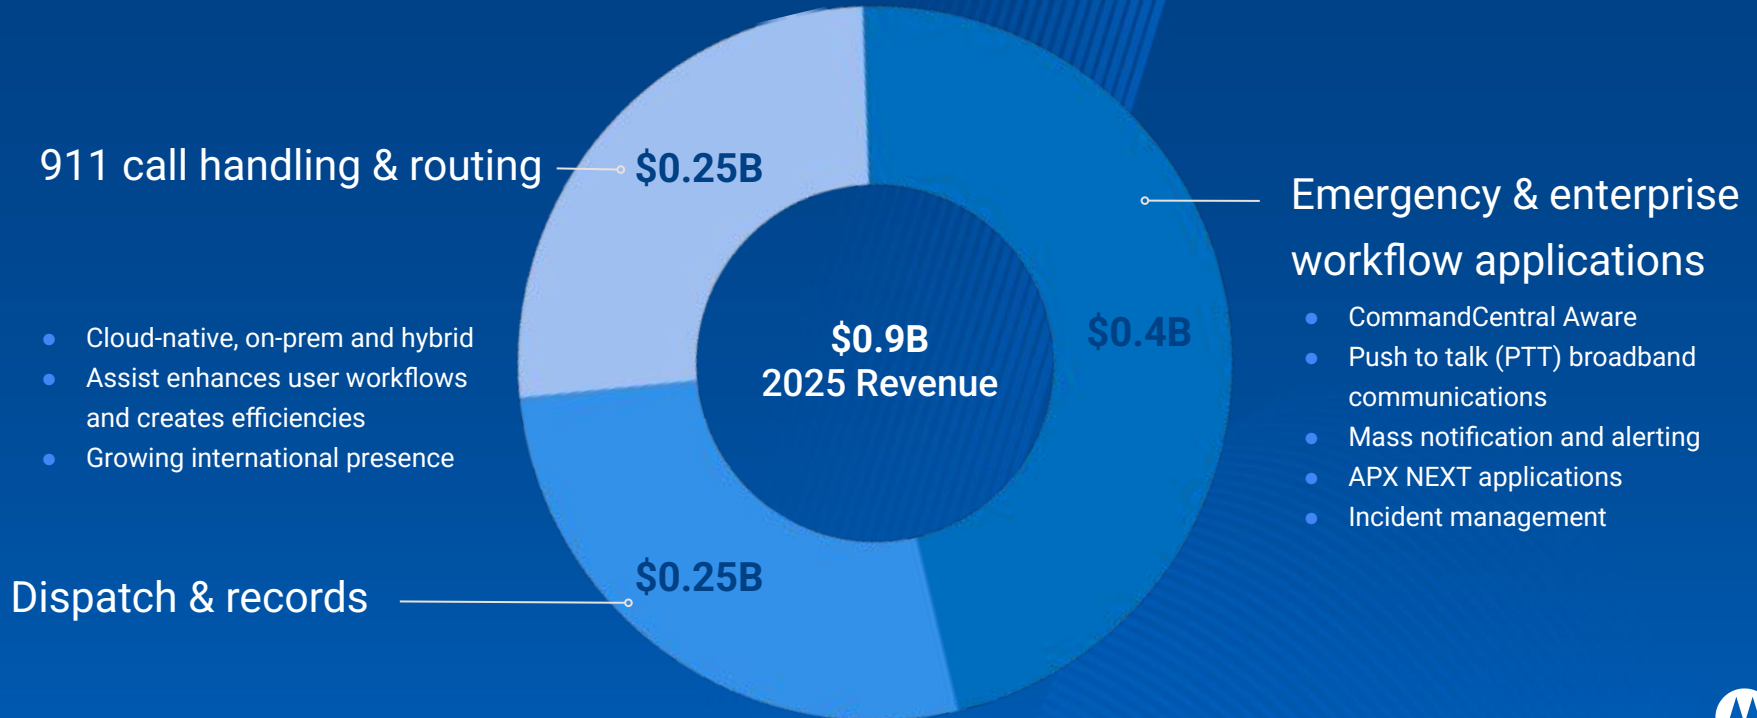

Resolution

Centralized records, evidence management and investigative tools

Helping public safety agencies, enterprises and communities work together through the phases of an incident as it unfolds.

Command Center

Command Center

Growth and Monetization

- Large software install base in 911 centers in the U.S. creates significant expansion opportunity
- Sales of \$0.9B growing double digits in \$22B TAM
- Margin expansion driven by transition to SaaS cloud offerings
- Rave and Noggin bridge enterprise security and public safety with panic button alerting, mass notification, Smart 911 app suite, business continuity management and incident management in a recurring revenue stream
- Public Safety Assist provides role-based AI for the emergency workflow, designed to deliver the right intelligence to the right person at the right time

~15% Sales Growth in 2026

Solving with AI

Taking a proactive and responsible approach to using AI to maximize efficiency and effectiveness

Human-Centered Application in 3 Areas

Automate analysis

Human attention

Detect key events and automate workflows

Accelerate response

Human action

Find answers without drowning in information

Protect privacy

Human judgement

Share information quickly while keeping the privacy of unrelated individuals and objects intact

Public Safety Assist Suites

Mission-critical AI suites, precision-engineered for the public safety workflow.
Impactful performance. Superior value.

Our impact

Our technologies can directly support some of the world's largest safety challenges every day.

Safer schools

More than 398,000 students have been exposed to gun violence in schools since the 1999 Columbine shooting.

Video cameras can give law enforcement visibility on scene, access control can automatically lock down doors and radios can support coordination and response.

Office of Community Oriented Policing Services made 211 awards totaling ~\$75M for School Violence Prevention Programs in 2025.

Soaring cyber attacks

383 confirmed cyber attacks impacted public safety agencies in 2025, with 21 mission-critical, 14 CAD, four 9-1-1 call handling and three radio system disruptions.

24/7 cybersecurity services can identify system and network risks, helping public safety agencies and businesses protect against attacks and respond to threats.

Cybercrime is projected to cost ~\$15.6T annually by 2029.

Natural disasters

Global economic losses due to natural disasters in 2025 reached more than \$260B, with 49 billion-dollar events.

Land mobile radio devices and networks are built for redundancy and can withstand extreme conditions, offering reliable communication that's critical to coordinate emergency response.

Omdia projects active LMR users will increase to 65.3M by 2029.

Responding faster to 911

~73% of people will call 911 in their lifetime:
~10K lives could be saved each year if 911 could get to callers just one minute faster.

A command center can unify information about an incident, from "911 call to case closure," helping to create a broad operational view that can simplify workflows and improve the accuracy and speed of decisions.

240M 911 calls are made to 911 each year.

Rising retail theft and violence

Retailers reported shoplifting incidents increased 18% and threats or acts of violence during shoplifting incidents increased 17% from 2023 to 2024.

Body cameras can be a deterrent to aggressive or criminal behavior in stores, while access control and panic buttons can make frontline workers feel safer.

Frontline workers make up 60% of the global workforce, with 21% in the U.S. retail industry alone.

"New defense" technologies

NATO members are increasing defense spending to modernize capabilities, including sensors, soldier systems and platforms, and UAVs/drones.

Deploying autonomous technologies for intelligence and reconnaissance safely provide additional distance between people and potential threats, helping to save lives while informing better tactical decisions.

The U.S. Army plans to purchase at least 1 million drones in the next two to three years.

Appendix

Safe harbor

A number of forward-looking statements are made during this presentation. Forward-looking statements are any statements that are not historical facts. These forward-looking statements are based on the current expectations of Motorola Solutions, and we can give no assurance that any future results or events discussed in these statements will be achieved. Any forward-looking statements represent our views only as of today and should not be relied upon as representing our views as of any subsequent date. Forward-looking statements are subject to a variety of risks and uncertainties that could cause our actual results to differ materially from the statements contained in this presentation.

Risks, uncertainties and other factors that may cause actual results to differ materially from those expressed or implied in the forward-looking statements include, without limitation: (i) impact of current global economic and political conditions in the markets in which we operate; (ii) increased areas of risk, increased competition and additional compliance obligations associated with the introduction of new or enhanced products and services in our segments; (iii) challenges related to the use of artificial intelligence (“AI”) in our products and services; (iv) impact of catastrophic events on our business or our customers’ or suppliers’ business; (v) the effectiveness of our strategic acquisitions, including the integrations of such acquired businesses; (vi) the inability of our products to meet our customers’ expectations or regulatory or industry standards, or actual or perceived systems or service failures of our products and services; (vii) our inability to purchase a sufficient amount of materials, parts, and components, as well as software and services, at acceptable prices to meet the demands of our customers, and any disruption to our suppliers or significant increase in the price of supplies; (viii) risks related to our large, multi-year system and services contracts; (ix) the global nature of our employees, customers, suppliers and outsource partners; (x) our use of third-parties to develop, design and/or manufacture many of our components and some of our products, and to perform portions of our business operations; (xi) the inability of our subcontractors to perform in a timely and compliant manner or adhere to our Human Rights Policy; (xii) inability to attract and retain senior management and key employees; (xiii) evolving and sometimes conflicting expectations from investors, customers, lawmakers, regulators and other stakeholders regarding social and sustainability considerations and disclosures; (xiv) challenges relating to existing or future legislation and regulations pertaining to AI, AI-enabled products and the use of biometrics and other video analytics; (xv) the impact, including increased costs and potential liabilities, associated with changes in laws and regulations regarding cybersecurity, privacy, data protection, data sovereignty and information security; (xvi) the impact of government regulation of radio frequencies; (xvii) regulations, laws and other compliance requirements and risks applicable to our U.S. government customer contracts and grants; (xviii) the impact, including increased costs and additional compliance obligations, associated with existing or future telecommunications-related laws and regulations; (xix) impact of product regulatory and safety, consumer, worker safety and environmental product compliance and remediation laws; (xx) impact of tax matters; (xxi) increased cybersecurity threats, a security breach or other significant disruption of our IT systems or those of our outsource partners, suppliers or customers; (xxii) our inability to protect our intellectual property or potential infringement of intellectual property rights of third parties; (xxiii) risks relating to intellectual property licenses and intellectual property indemnities in our customer and supplier contracts; (xxiv) our license of the MOTOROLA, MOTO, MOTOROLA SOLUTIONS and the Stylized M logo and all derivatives and formatives thereof from Motorola Trademark Holdings, LLC; (xxv) inability to access the capital markets for financing on acceptable terms and conditions; (xxvi) exposure to exchange rate fluctuations on cross-border transactions and the translation of local currency results into U.S. dollars; (xxvii) impact of returns on pension and retirement plan assets and interest rate changes; and (xxviii) the return of capital to shareholders through dividends and/or repurchasing shares. Motorola Solutions undertakes no obligation to publicly update any forward-looking statement or risk factor, whether as a result of new information, future events or otherwise. For additional information on identifying factors that may cause actual results to vary materially from those stated in forward-looking statements, see our reports on Forms 10-K, 10-Q and 8-K filed with or furnished to the SEC from time to time available for free on the SEC’s website at www.sec.gov, and on Motorola Solutions’ website at www.motorolasolutions.com/investors.

This presentation contains information and statistics derived from third-party sources. While Motorola Solutions believes these third-party sources to be reliable, we have not independently verified the accuracy or completeness of any such information. Motorola Solutions makes no representation or warranty, express or implied, as to the accuracy or completeness, of any third-party information contained herein.

Unless otherwise indicated, information in this presentation was updated on the 1st day of June 2026. For the avoidance of doubt, the 2026 fiscal year guidance was provided as of May 7, 2026 and has not been updated or reaffirmed as of the date of this presentation. The content of this presentation contains time-sensitive information that is accurate only as of the time hereof. If any portion of this presentation is rebroadcast, retransmitted or redistributed at a later date, Motorola Solutions will not be reviewing or updating the material that is contained herein.

Use of non-GAAP measures

In addition to the results presented in accordance with accounting principles generally accepted in the U.S. (“GAAP”) in this presentation, Motorola Solutions, Inc. (“Motorola Solutions” or the “Company”) has provided certain non-GAAP measurements. Motorola Solutions has provided these non-GAAP measurements to help investors better understand its core operating performance, enhance comparisons of Motorola Solutions’ core operating performance from period-to-period and to allow better comparisons of Motorola Solutions’ operating performance to that of its competitors. Among other things, the Company’s management uses these operating results, excluding the identified items, to evaluate the performance of its businesses and to evaluate results relative to incentive compensation targets. Management uses operating results excluding these items because it believes these measurements enable it to make better period-to-period evaluations of the financial performance of core business operations. There are inherent limitations in the use of operating results excluding these items because the Company’s GAAP results include the impact of these items. The non-GAAP measures are intended only as a supplement to the comparable GAAP measures and the Company compensates for the limitations inherent in the use of non-GAAP measures by using GAAP measures in conjunction with the non-GAAP measures. As a result, investors should consider these non-GAAP measures in addition to, and not in substitution for, or as superior to, measures of financial performance prepared in accordance with GAAP.

Details of these items and reconciliations of the non-GAAP measurements provided during this presentation to GAAP measurements can be found in this Appendix to this presentation and on Motorola Solutions’ website at investors.motorolasolutions.com

The Company has not quantitatively reconciled its guidance for forward-looking non-GAAP metrics to their most comparable GAAP measures because the Company does not provide specific guidance for the various reconciling items, as certain items that impact these measures have not occurred, are out of the Company’s control, or cannot be reasonably predicted. Accordingly, a reconciliation to the most comparable GAAP financial measure is not available without unreasonable effort. Please note that the unavailable reconciling items could significantly impact the Company’s results.

“Adjusted Operating Cash Flow,” “Free Cash Flow,” “Adjusted Free Cash Flow,” “EBITDA,” “Adjusted EBITDA,” “Adjusted EBITDA Margin,” “Net Debt,” “Net Debt to Adj. EBITDA Ratio,” and “the Rule of 40” are non-GAAP measures and should not be considered as a replacement for GAAP results. These non-GAAP measures may not be comparable to similarly-titled measures reported by other companies. The primary limitation of these measures are that they exclude the financial impact of items that would otherwise either increase or decrease our reported results. These limitations are best addressed by using these non-GAAP measures in combination with the most directly comparable GAAP measures in order to better understand the amounts, character and impact of any increase or decrease in reported amounts. The following provides additional information regarding these non-GAAP measures.

Adjusted Operating Cash Flow - Represents operating cash flow under GAAP excluding a \$500 million voluntary, debt-funded U.S. pension contribution in the first quarter of 2018. The Company has excluded the impact of this contribution because the Company believes that this item does not reflect expected future operating cash flows and does not contribute to a meaningful evaluation of the Company’s current operating cash flow performance or comparisons to the Company’s past operating cash flow performance.

Free Cash Flow - Represents net cash provided by operating activities (“operating cash flow”) less capital expenditures. The Company believes that free cash flow is also useful to investors as the basis for comparing its performance and coverage ratios with other companies in the Company’s industries, although the Company’s measure of free cash flow may not be directly comparable to similar measures used by other companies. This measure is also used as a component of incentive compensation.

Use of non-GAAP measures

Adjusted Free Cash Flow - Represents Free Cash Flow excluding a \$500 million voluntary, debt-funded U.S. pension contribution in the first quarter 2018. The Company has excluded the impact of this contribution because the Company believes that this item does not reflect expected future free cash flows and does not contribute to a meaningful evaluation of the Company's current free cash flow performance or comparisons to the Company's past free cash flow performance.

EBITDA - Represents net income before interest expense, interest income, income taxes, depreciation, and amortization.

Adjusted EBITDA - Represents EBITDA adjusted for net other income, income from discontinued operations, share based compensation expense, U.S. pension settlement loss, and special items including charges or income related to reorganization and other charges, acquisition related charges, impairment charges, and other income or charges, if any. The Company believes Adjusted EBITDA provides improved period-to-period comparability for decision making and better measures the ongoing earnings results of its strategic and operating decisions by excluding the earnings effects of reorganization activities.

Adjusted EBITDA Margin - Adj. EBITDA Margin is calculated as Adjusted EBITDA divided by Revenue.

Net Debt and Net Debt to Adj. EBITDA Ratio - Net Debt is calculated as Long-term Debt, including the Current Portion of Long-term Debt, less Cash and Cash Equivalents. Net Debt to Adj. EBITDA Ratio is calculated by dividing Net Debt by Trailing 12 month Adjusted EBITDA.

Rule of 40 - The "Rule of 40" is a percentage amount that is calculated as the sum of the Company's annual net sales growth rate, plus the Company's Adjusted EBITDA Margin for each of the periods presented. It is used to assess a company's balance between growth and profitability. A total of over 40 is thought to indicate a healthy combination of expansion and financial stability. The Company believes that the Rule of 40 is useful to investors as a basis to gauge the potential for the Company's long-term success and to make informed decisions about the Company's resource allocation and business strategy.

* Amounts attributable to Motorola Solutions, Inc. common shareholders.

** Under U.S. GAAP, the accounting for a net loss from continuing operations results in the presentation of dilutive earnings per share equal to basic earnings per share, as any increase in basic shares would be anti-dilutive to earnings per share. As a result of the highlighted items identified during Q4 2017, the Company reported a net loss from continuing operations within our GAAP Consolidated Statement of Operations, while reporting income on a non-GAAP basis. An adjustment is shown to reflect the dilution of 7.2 million dilutive shares outstanding in Q4 2017 and 6.4 million dilutive shares for the full year of 2017.

*** Under U.S. GAAP, the Silver Lake shares were considered anti-dilutive to earnings per share for the year ended December 31, 2024 and were excluded from the computation of GAAP diluted weighted average common shares and diluted earnings per share. The shares are considered dilutive for non-GAAP earnings per share for the year ended December 31, 2024 and an adjustment is reflected to include these shares for non-GAAP diluted earnings per share.

****Highlighted items: The company has excluded the effects of highlighted items including, but not limited to, acquisition-related transaction fees, tangible and intangible asset impairments, reorganization of business charges, certain non-cash pension adjustments, legal settlements and other contingencies, gains and losses on investments and businesses, Hytera-related legal expenses, gains and losses on the extinguishment of debt, contingent earnout consideration and the income tax effects of significant tax matters, from its non-GAAP operating expenses and net income measurements because the company believes that these historical items do not reflect expected future operating earnings or expenses and do not contribute to a meaningful evaluation of the company's current operating performance or comparisons to the company's past operating performance. For the purposes of management's internal analysis over operating performance, the company uses financial statements that exclude highlighted items, as these charges do not contribute to a meaningful evaluation of the company's current operating performance or comparisons to the company's past operating performance.
