

Audio Logging for ASTRO® 25

Secure, unified, and mission-critical recording for P25 communications

In public safety and critical infrastructure, every second and every word counts. Exacom's HindSight platform provides a seamless, high-performance recording integration specifically engineered for Motorola Solutions ASTRO® 25 radio systems.

By bridging the gap between radio, telephony, and multimedia data, HindSight gives your agency a single, CJIS-compliant "source of truth" for every incident.

Why choose HindSight for your ASTRO systems?

→ Native integration

HindSight is a purpose-built solution that interfaces directly with the Motorola Solutions Archiving Interface Server (AIS). This means every transmission is captured with clear audio and full P25 metadata—including Radio ID's, Alias names, and Talkgroup details—directly from your Motorola Solutions infrastructure.

→ Unified communication intelligence

Eliminate data silos. HindSight records your ASTRO radio traffic alongside emergency 9-1-1 lines, administrative office phones, and digital multimedia—all accessible through one modern, intuitive web interface.

→ Security & compliance built-in

Designed for the rigors of public safety, HindSight features robust AES-256 encryption, detailed audit trails, and strict agency partitioning, this means that only authorized personnel can access sensitive recordings.

Flexible deployment options: cloud, virtual, or on-prem

We meet you where your IT strategy lives. HindSight offers the most versatile deployment options in the industry:

HindSight cloud

- Hosted in AWS GovCloud, 100% cloud-native
- Infinite scalability, zero hardware footprint
- Fully managed by Exacom, reduced IT overhead
- Rapid feature release without manual upgrades

Virtual environments

- Fully optimized for VMware and Hyper-V
- Can be deployed on existing hardware to reduce costs
- Simplified disaster recovery
- Centralized management

On-premise

- Traditional deployment for agencies preferring localized control
- Deployed on highly-reliable COTS (Commercial Off-The-Shelf) hardware

Key benefits at a glance

| FEATURE | WHAT IT MEANS FOR YOUR AGENCY |
|-----------------------|---|
| Complete call capture | Record Talkgroup, Individual (Unit-to-Unit), Emergency, and Announcement Group calls without missing a beat. |
| Instant playback | Dispatchers and supervisors can instantly replay the last several transmissions to clarify critical details. |
| Multi-tenancy | Securely partition data so multiple agencies can share a single system while maintaining strict data privacy. |
| AI-ready workflow | Optional high-accuracy transcription and AI-driven redaction to save precious minutes. |

Seamless procurement & support

Exacom is a proud member of the Motorola Solutions family. This means your agency benefits from a simplified “one-stop” experience.

Direct ordering

HindSight is available through Motorola Solutions ordering tools, simplifying your procurement process.

Collaborative support

Our team works hand-in-hand with Motorola Solutions field engineers to ensure your recorder is optimized for your specific ASTRO release (versions 17 through 21+).

Ready to modernize your PSAP?

Don't let your critical data sit in disconnected silos. Upgrade to a recording solution that is as reliable as your ASTRO radio network.

Contact your Motorola Solutions Account Executive or visit our website to schedule a demonstration of HindSight.
