

Protecting the path from “help” to “home”

K-12 Resilience

An incident isn't over when the alarm stops—it's over when every child is accounted for and safely reunited with their family. Traditional safety tools focus almost entirely on the speed of the initial alert, leaving school administrators and staff to navigate the chaotic hours that follow using disconnected tools and outdated paper rosters. This creates dangerous operational blind spots after the sirens fade, forcing educators to manage administrative chaos when they need to be focused on keeping children safe.

By embedding the 'I Love U Guys' Foundation's recognized framework directly into your safety protocols, the platform guides school personnel through clear, pre-planned actions. The solution utilizes Clever® for digital student rosters, helping your staff accurately account for students when seconds matter. From the initial alert to the final reunification, this end-to-end solution supports your school safety mission, reinforcing the commitment to safety across your campus.

Automate incident response

When connected to public safety through local PSAP partnerships, K-12 Resilience can share panic button data to help dispatchers and first responders.

Account for every student

Replace paper rosters with integrated Clever® platform data. Give your staff digital tools that help verify status quickly.

Streamline guardian reunification

Manage your emergency workflows on a single platform. A dedicated reunification process helps deliver an organized and documented transition.

Key features

Standard Response Protocols

The embedded "I Love U Guys" Foundation framework guides your staff through pre-planned actions such as Lockdown, Hold or Evacuation, keeping your team aligned using established language.

Connected reunification workflows

Bring closure to critical events by simplifying the final handoff. K-12 Resilience sends clear notifications to coordinate guardian reunification, providing a dedicated interface to quickly verify guardian identities and document the safe return of every child.

Smart student accountability

Replace paper clipboards with digital rosters to verify which students are accounted for before reunification begins. Teachers can account for students quickly on web-enabled devices, building an organized, documented response.

Tailored dashboards

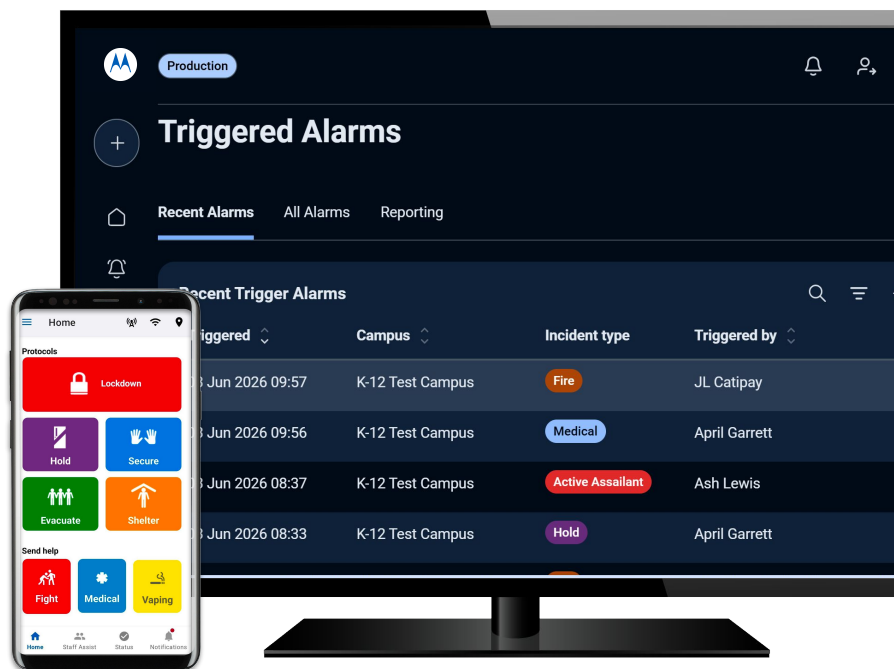

Whether you are a teacher, principal or security director, the platform displays the specific tools required for your duties. This tailored dashboard helps prevent information overload, enabling your teams maintain focus and execute responsibilities with clear direction.

Safety that stays until the story ends

School safety demands an integrated technology solution that stays with your team from the very first call for help to the final, safe reunification.

K-12 Resilience closes the operational gaps that leave traditional safety models unfinished, protecting the path from "help" to "home". By bringing automated incident response, smart rostering and structured guardian workflows into a single dashboard, we help keep school communities truly secure.
