

COMMANDCENTRAL AWARE ENTERPRISE

COMPLETE REAL-TIME OPERATIONAL AWARENESS OF PERSONNEL AND ASSETS FROM ANYWHERE

Improve operational awareness, security, and incident response with CommandCentral Aware Enterprise, a cloud-based solution that provides a consolidated view of real-time MOTOTRBO™ and WAVE-enabled broadband device and incident locations, plus video cameras and feeds.

ENHANCE OPERATIONAL SUCCESS

Proven in real-time public safety critical and non-critical responses, Aware Enterprise integrations provide for live-video streaming, real-time asset locations, weather, floor plans, license plate recognition, and other third party applications.

IMPROVE DECISION MAKING

Monitor mapped device locations and view live video feeds from multiple sites in a single view. Automate responses based on device locations, real-time video, video rewind, and license plate detection alerts.

ACCELERATE RESPONSE

Quickly identify nearby personnel with the right skills to respond at the right time and place. Equip personnel with situational detail from video feeds and device locations to speed response and improve safety.

STREAMLINE WORKFLOWS

Improve response to an incident, service call, or emergency as it is unfolding. Understand past incidents with video and historical mapping for recreating your security personnel's incident response to identify and automate workflow improvements.

KEY FEATURES

CUSTOMIZE MAPPING WITH ESRI LAYERS GEO FENCING, and FLOOR PLANS

Make the Aware Enterprise map work for you. Add Esri layers including traffic, weather, or custom layers. Add geo-fences around an area to track device entry and upload your floor plans to access and view cameras by floor.

AUTOMATE WORKFLOWS WITH RULES

Add custom rules to automate workflows. Set map and video alerts and alarms to trigger workflow actions and response.

RECREATE INCIDENT RESPONSE

Device breadcrumbing in real-time enables you to view personnel issues and to better communicate response times. Use historical mapping and video rewind to recreate past responses for analysis, investigations, and reporting.

MAKE THE RIGHT DECISION AT THE RIGHT TIME, EVERY TIME

Everything happens somewhere. Where are service personnel? Where can I find a security officer to respond to a critical incident? What is happening on my campus?

The more visibility you have into your personnel and operations, the easier it is to make the right decisions at the right time with the right personnel. Aware Enterprise provides that visibility and more.
