ENSURING SAFE COMMUNICATION, NO MATTER THE ELEMENT

APX 4000XH PORTABLE RADIO

Mining and Petrochemical personnel are faced with extreme temperatures and challenging conditions in everyday operations and require an adaptable two-way radio to instantly transmit voice and data communications and collaborate with work partners in real-time.

The APX 4000XH is a purpose-built P25 two-way portable radio delivering loud, clear audio that significantly reduces background noise to ensure the message gets through the first time, in noisy environments. Given that the APX 4000XH is intended for use in extreme operating environments, its purpose-built design has been subjected to extreme testing to simulate harsh usage in field. This unbeatable offering seamlessly connects workers while increasing operational efficiency and employee productivity.

LOUD AND CLEAR

The APX 4000XH leverages the leading attributes of the APX family of P25 TDMA portables like the 2-microphone design. Built to reduce background noise, you can speak and hear clearly over heavy equipment, diesel engines and drilling activities.

- New magnetic speaker grill has reduced magnetic force to deflect metallic dust and fibers from impacting audio quality.
- Dual microphone locates voice and cancels out ambient noise.
- Extreme Audio Profile reduces background noise and improves voice clarity.
- Equipped with the latest AMBE digital voice vocoder.

HAZLOC SAFE

A compact P25 Phase 2 capable portable, the APX 4000XH is built tough —inside and out to withstand harsh environments and tested to the US military standard MIL-STD Rated G. The skeleton design also helps protect the core from shock/impact and submersion.

- Highest hazardous classification rating offered on APX portfolio: CSA -157, IECEx.
- With the bright orange HAZLOC safe standard housing, this radio is easy to identify in hazardous conditions.
- Simplified, 2 knob controls provide easy access to channel switching and volume control when using gloves.
- Enhanced T-grip design provides better grip and control.
