

VB400-AS-A-SERVICE

TRANSPARENCY SHOULDN'T COME AT A HIGH PRICE

Get your cameras and get going. Our simple pay-as-you-go program helps you get everything you need for your body-worn policing program with no upfront capital investment — from a robust camera system to a complete video management system.

As the requirement for law enforcement body-worn cameras continues to grow, the obstacles to acquisition remain the same.

Raising funding and securing grants is difficult and time-consuming. Data storage and system maintenance costs are hard to predict. And video technology continues to mature, making a big investment potentially risky.

Motorola Solutions is overcoming these obstacles by delivering body-worn cameras, digital evidence solutions and support services through our Video-as-a-Service program.

With no up-front capital investment required, you can deploy a new camera system and start using it immediately through our simple 5-year pay-as-you-go program. Everything you need is provided, including your camera, required accessories, management software, video storage, service and support. If you already have content stored on a body-worn video system, we can work with you to migrate your video material to the new platform.

NO NEED TO RAISE FUNDS

Get what you need with no upfront investment. This pay-as-you-go structure turns a capital investment into a manageable operational expense.

BUDGET PREDICTABILITY

Stay on budget with a low payment, fixed for 5 years, that includes your camera system, software, support, and video storage software, and support.

ASSURED PERFORMANCE

Maintain efficiency and reliability, with Manufacturer's hardware warranty, advance hardware replacement and 8x5 phone support.

TECHNOLOGY REFRESH

Stay current with the latest technology, with a free refresh of your body-worn cameras and batteries during the program.
