

MOTOTRBO™ OPERATIONS CRITICAL WIRELESS ACCESSORIES

UNLEASH THE POWER OF YOUR RADIO WITH BLUETOOTH® ACCESSORIES

LONG RANGE WIRELESS REMOTE SPEAKER MICROPHONE

ENHANCED REMOTE OPERATIONS. MAINTAIN CRITICAL COMMUNICATIONS EVEN ON REMOTE JOB SITES.

SITUATION

You are a utility worker and need to check the meter readings. You have to park your truck about 100 meters away from the utility box due to access restrictions. Once you leave your truck, you are without access to your mobile radio and have no way to communicate until you return to your vehicle.

SOLUTION

With the Long Range Wireless Remote Speaker Microphone (RSM), you can stay connected to your MOTOTRBO Mobile Radio from up to 100 meters away, allowing you to maintain critical communications where you never thought possible.

Before getting out of the vehicle, you use touch pairing to pair the Long Range Wireless RSM instantly to the mobile microphone with Bluetooth gateway. This means you're ready to go in just seconds.

Working in the dark? The task light on this RSM enables you to read important information in low-light environments.

The bottom line? You're able to get the meter readings you needed, communicate them effortlessly and clearly back to dispatch, all while working outside of your vehicle.

WIRELESS REMOTE SPEAKER MICROPHONE

**BE READY IN
SECONDS.
MOVE FREELY
WITHOUT WIRES
GETTING IN
THE WAY.**

SITUATION

You work in a warehouse and have to get up on a ladder to access supplies. Moving freely without restrictions is necessary, but can be challenging. You're concerned about the radio on your hip and the RSM cord getting caught on the ladder.

SOLUTION

With the Wireless Remote Speaker Microphone, you can successfully put down your radio and move about freely. You no longer have to be concerned about your cord getting in the way. Rather, you can perform your daily tasks safely, maneuver in tight spaces with ease and keep your focus on the task at hand.

At the start of your shift, you simply pair the Wireless RSM to your radio via voice prompts; set-up is effortless. Then, you put your radio down, clip your Wireless RSM to your shoulder, and go about your duties with freedom of movement and ease. You'll stay connected to your radio up to 10 meters away, in-line-of-sight.

If an accident were to happen, you can instantly call for help with a push of the emergency button on the Wireless RSM. Work safer, smarter, and more comfortably in demanding environments.

BLUETOOTH® ACCESSORY KIT

KEEP YOUR FOCUS
ON THE CUSTOMER.
PROFESSIONAL
COMMUNICATIONS
SOLUTIONS.

SITUATION

Two people are creating a scene in the hotel lobby. As the hotel manager, you need to walk over to help diffuse the situation. You need to have access to your radio to call for help if needed, but worry about where to put it. You don't want to hold it in your hand, as you may need full control of your hands if the situation escalates.

SOLUTION

With the Bluetooth Accessory Kit, you can simply leave your radio behind the reception desk and head over to handle the incident hands-free. While making your way over to the visitors, you discreetly use the Operations Critical Wireless Push-to-Talk in your pocket to describe the situation to hotel security via your business professional Bluetooth earpiece.

You are able to keep your focus on the incident while listening to security through the comfortable earpiece. They quickly respond to resolve the incident before it escalates.

Our broad portfolio of wireless Bluetooth accessories deliver safer, more effective communications - enabling you to discover better ways to work, wherever that may be.

Wireless Push-To-Talk

SITUATION

It's your job as an undercover officer to monitor students inside a football arena. To do this, you need to communicate covertly with colleagues. Your options are to wear a traditional earpiece, which makes you easily recognizable, or to go without audio accessory and lose access to critical communication.

SOLUTION

Blend into your surroundings with the Completely Discreet Wireless Kit. With a tiny receiver hidden in your ear, a microphone hidden under your lapel and a communications loop beneath your shirt, you can talk and listen to your hidden radio in total privacy.

As the game progresses, you notice suspicious activity behind the bleachers and press the wireless push-to-talk button hidden in your pocket to call for help. Backup is on the way and together you remove the perpetrators without anybody realizing what's going on

SITUATION

It's hectic in the supply room at the start of a shift with all your colleagues setting up their radios at the same time. You want to be wireless but are worried about pairing to other wireless devices and therefore the wrong radio.

SOLUTION

Touch pairing makes everything easy. Simply pick up and pair your radio with your wireless earpiece in seconds by touching the wireless adapter and earpiece together.

The Motorola close proximity pairing ensures you never connect to the wrong device. With peace of mind, you head out onto the factory floor and start working immediately.

ENHANCED WIRELESS ADAPTER AND EARPIECE

OPERATIONS CRITICAL WIRELESS EARPIECE

**DRIVE SENSIBLY.
KEEP YOUR EYES
ON THE ROAD AND
COMMUNICATE
HANDS-FREE.**

SITUATION

You are on the road and receive an incoming message on your mobile. With your traditional mobile microphone, you have to take your hand off the steering wheel in order to answer incoming calls.

SOLUTION

At the beginning of your shift, you paired your Operations Critical Wireless Earpiece to your mobile radio and are now able to respond to radio calls using your wireless earpiece and steering wheel mounted push-to-talk. Fingertip control from the wheel means you can stay in constant communication with customers en route and remain completely safe while driving.

Even though you are connected to your mobile radio with your wireless earpiece, you can continue to communicate with your mobile microphone whenever you chose to do so. Just press the push-to-talk on your mobile microphone and the audio automatically switches from your wireless earpiece to your mobile microphone.

SITUATION

It's the middle of a shift, and with machinery running at full speed, your workplace is very noisy. To work safely, you need to be able to communicate on your radio while still being aware of everything around you. Protecting your hearing is critical.

SOLUTION

Connect your XBT Heavy Duty Headsets via Bluetooth to your MOTOTRBO radio, suppressing noise for clearer communications. While all dangerous sounds are blocked out, the patented SENS™ situational awareness technology ensures you'll hear critical communications.

While you're reading an incoming text message on your radio display, your co-worker shouts a warning about an oncoming forklift. Despite wearing a heavy-duty headset, you heard his warning loud and clear, and are able to safely step out of the way.

SITUATION

While working in a manhole underground, you need to talk to your colleagues above ground about an issue. With no radio reception underground, this means a trip back up the shaft, wasting precious time.

SOLUTION

Luckily, you left your radio above ground and can talk through the problem on your intrinsically safe wireless earpiece. Hazardous environments require critical communications and our operations critical wireless earpieces ensure you can complete the job safely and efficiently.
