

# THE PUBLIC SAFETY THREAT ALLIANCE: A CYBER THREAT SHARING INITIATIVE

Public safety organizations need dedicated information and intelligence-sharing capabilities to protect against cyber threats, which are growing in scale and complexity. To provide them with the knowledge they need to defend against attacks, Motorola Solutions has established the Public Safety Threat Alliance (PSTA), a cyber threat Information Sharing and Analysis Organization (ISAO).

## OUR VISION

Our vision is to create a world-class hub that fills the void that public safety agencies experience to better arm them against the threats we see every day.

By collecting and sharing input about ransomware attacks, indicators of compromise and other activity, we can provide actionable intelligence that will better inform our customers and the public safety sector at large on how to defend against them.

## OUR SHARED MISSION

The PSTA serves as a cyber threat intelligence sharing, collaboration and information hub for the evolving cyber security challenges faced by the global public safety community. The PSTA strives to improve the cyber security posture, defense and resilience of our members.

We collaborate with trusted partners to collect and analyze cyber threat information to protect public safety organizations and the communities they serve. The PSTA is recognized by the Cybersecurity and Infrastructure Security Agency (CISA) as an official ISAO.

**CONCENTRATED**  
Threat intelligence and  
information sharing

**COMMITTED**  
Reduce the cybersecurity  
burden on agencies

**CAPABLE**  
Proactive defense solutions  
for public safety

## TRUSTED LEADERSHIP TO COLLECT AND SHARE INTELLIGENCE

Motorola Solutions’ role as a leader in mission-critical communications and cybersecurity for public safety agencies gives us exceptional insights into the cyber threats they face.

The PSTA collects cyber threat information from law enforcement, private sector and other sources and fuses it into a coherent threat picture for PSTA members, providing public safety-focused actionable intelligence. Our objectives include:

- Centralizing information from members, trusted partners and Motorola Solutions Cybersecurity Services;
- Delivering threat intelligence and proactive defense solutions; and
- Reducing the cybersecurity burden on public safety organizations so they can focus on their mission of protecting life, health and property for their constituents.

## A SHARED APPROACH TO REDUCING THE RISK OF CYBER ATTACKS

Cyber threats to Public Safety organizations are increasing in scope, scale, and complexity but most agencies lack a comprehensive picture of these threats.

The PSTA harnesses a collaborative approach to threat intelligence, and leverages the global reach of Motorola Solutions’ cybersecurity services, to enhance visibility of cyber threats to public safety and improve the cybersecurity posture of the entire community. Member benefits include:

- Actionable intelligence from multiple sources, including member reporting.
- A wide range of cybersecurity information and resources, including a Threat Intelligence Exchange for secure communications, flash reports for breaking news and zero-day threats, newsletters and webinars.
- No cost for public safety entities to join the PSTA, and non-customers are invited to join. Information sharing is optional but encouraged.
