(“Motorola” or “Company”) will provide telecommunications services, including 9-1-1 Emergency Services and NG9-1-1 Emergency Services, in the state of Pennsylvania. By executing a Motorola Service Order Agreement (“SOA”) or Customer Agreement, or by using or paying for services provided herein, the Customer executing the SOA or Customer Agreement or paying for the services agrees to the service regulations and terms and conditions described herein. (C)

The services covered in this Tariff are subject to availability and may not be available in all locations. TARIFF FORMAT

- A. **Page Numbering** - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between Page 14 and 15 would be 14.1.
- B. **Page Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th revised Page 14 cancels the 3rd revised Page 14.
- C. **Paragraph Numbering Sequence** - There are various levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2
 - 2.1
 - 2.1.1
 - 2.1.1.1
- D. **Check Sheets** - When a tariff filing is made with the Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the pages contained in the tariff, with a cross-reference to the current revision number. When new pages are added, the Check Sheet is changed to reflect the revision. An asterisk designates all revisions made in a given filing (*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc., remain the same, just revised revision levels on some pages.) The tariff user should refer to the latest Check Sheet to find out if a particular page is the most current on file with the Commission.

2.7.2 Collection procedures and temporary disconnection of service are unaffected by the application of a late charge. The late payment charge does not extend the time for payment or otherwise enlarge or change the rights of a Customer. Notice of intention to pay late will not avoid this charge.

- 2.9.2 The amount paid by the Company to a municipality as a cost of doing business within that municipality under a franchise, or pursuant to a license or occupation tax levied by the municipality, will be added to the bill for service to the Company's Customers within such municipality and for the privilege of employment within the municipality shall be so surcharged.

- 2.10.6.3 When service is interrupted for a period of at least 24 hours due to such factors as storms, fires, floods or other conditions beyond the control of the Company, an allowance of 1/30 of the tariff monthly rate for all services and facilities furnished under tariff by the Company rendered inoperative or substantially impaired to the extent of being useless shall apply for each full 24 hours during which the interruption continues after notice by the customer to the Company.

- 2.10.7 In addition and not by way of limitation, in the event that there is a delay in installation of service, if any service date is promised, or any failure to service or properly maintain the items of service as provided for herein concerning maintenance or any failure to repair or replace the items of service, then any refunds due, as provided within agreements with the customer, shall be applied. 2.11.1 General

Where equipment, facilities, or service arrangements are requested which are not provided for in the Company's applicable Tariffs, monthly rates and one-time charges, such as nonrecurring and construction charges, will apply based on the circumstances in each case.

2.11.1.2 These special equipment and service items will be provided whenever, in the judgment of the Company, there is a valid reason for providing the service requested. In such cases, the Company reserves the right to require an initial contract period commensurate with relevant circumstances.

- 2.12.2 If a Customer cancels an SOA or Customer Agreement or terminates services before the completion of the term for any reason whatsoever other than a Service Interruption, the Customer agrees to pay to the Company termination liability charges, as defined below. These charges shall become due as of the effective date of the cancellation or termination. (C)
- 2.12.3 The Customer's liability for early cancellation or termination of service shall be equal to the following:
- 2.12.3.1 All unpaid Nonrecurring Charges, less any portion of the underlying cost of the Nonrecurring Charges not yet incurred by the Company in preparing to establish service for the Customer;

2.13.3 The Company's services are available for use twenty-four (24) hours per day.

2.13.4 Unlawful Use of Service

2.13.4.1 Service shall not be used for any purpose in violation of law or for any use as to which the Customer has not obtained all required governmental approvals, authorizations, licenses, consents, and permits. The Company shall refuse to furnish service to an applicant or shall disconnect the service without notice of a Customer when:

2.13.4.2 An order shall be issued, signed by a judge finding that probable cause exists to believe that the use made or to be made of the service is prohibited by law, or

2.13.4.3 The Company is notified in writing by a law enforcement agency acting within its jurisdiction that any facility furnished by the Company is being used or will be used for the purpose of transmitting or receiving gambling information in interstate or foreign commerce in violation of the law.

COMPETITIVE LOCAL EXCHANGE CARRIER

- 2.13.4.4 If service has been physically disconnected by law enforcement officials at the Customer's premises and if there is not presented to the Company the written finding of a judge, then upon written or verbal request of the Customer, and agreement to pay restoral of service charges and other applicable service charges, the Company shall promptly restore such service.
- 2.13.5 Obligation to Furnish Service

At the option of the Company, in managing its facilities, certain regular service restrictions may be temporarily imposed at locations where new or additional facilities being constructed are not readily available to meet service demands.
- 2.13.5.2 When connections are requested and facilities to provide the required connections at the CO normally designated to serve the premises of the Customer are inadequate, facilities may be furnished from another CO to provide the requested interconnection. - 2.13.6 Limited Communication

- 2.13.7 Resale/Sharing of Service

- 2.13.8 The Company shall maintain only the facilities and equipment that it furnishes to the Customer. The Customer may not, nor may the Customer permit others to, rearrange, disconnect, remove, attempt to repair, or otherwise interfere with any of the facilities or equipment installed by the Company, except upon the written consent of the Company. (C)
- 2.13.9 The Company may substitute, change or rearrange any equipment or facility at any time and from time to time, but shall not thereby alter the technical parameters of the service provided the Customer.

2.14 Suspension and Termination of Service

The Company shall mail or deliver written notice to the customer at least 7 calendar days before the date of proposed suspension regardless of the grounds upon which suspension is sought. When at least 10 calendar days have passed since suspension of service, the Company may terminate service for failure to pay a reconnection fee and to remedy the original grounds for suspension. The only exception for suspension without prior notice is when the suspension is based on an occurrence, which endangers the safety of a person or appears likely to prove physically harmful to the service delivery system. At the time of suspension the Company shall mail a notice of suspension to the customer's billing address.

2.15 Pennsylvania Telephone Relay Service

The Pennsylvania Telecommunications Relay Service (PA TRS) is a relay telecommunication service for the deaf, hard of hearing, hearing and/or speech disabled population of the Commonwealth. The PA TRS is mandated by the Americans with Disabilities Act of 1990 to provide functionally equivalent telephone services that are available to other U.S. citizens, at no additional cost. The PA TRS includes both traditional relay (devices such as Teletypewriters (TTY) and Telecommunication Devices for the Deaf (TDD)) and captioned- telephone voice-carry-over relay services (captioned telephone). These relay services permit telephone communications between individuals with hearing and/or speech disabilities, who must use a TTY, TDD, or captioned telephone, with individuals having normal hearing and speech. Additionally, 711 abbreviated dialing is available to access the PA TRS. The Company's switching equipment is arranged to translate the "711" Calls to the assigned toll- free number, (888) 895-1197, in order to route Calls to the Telecommunications Relay Service Provider, in accordance with Commission's Order entered on February 4, 2000 at Docket No. M-00900239.

(C)
(C)**2.15.1 Surcharge**

In addition to the charges provided in this tariff, a surcharge will apply to all residence and business access lines served by this Company (Access lines are those lines extending from the telephone company's central office to the end-user's premises). This surcharge applies regardless of whether or not the access line uses the PA TRS.

The surcharge serves as the funding vehicle for the operation of the PA TRS, Telecommunications Device Distribution Program, and the Print Media Access Service Program and shall be calculated by the Pennsylvania Public Utility Commission (Commission). The Commission shall compute the PA

 COMPETITIVE LOCAL EXCHANGE CARRIER

TRS surcharge each year and notify local exchange carriers of the surcharge amount to be applied for the twelve-month period commencing with July 1 of each year. The Commission may revise the surcharge more frequently than annually at its discretion. Tariff revisions will be filed whenever the Commission calculates a new surcharge amount and notifies the Company.

The following surcharge rates apply to all customer bills issued on or after August 1, 2022. (C)

Monthly Charge

Per residence access line: \$0.00 (C)

Per business access line: \$0.00 (C)

Centrex lines will be assessed on an equivalency basis as determined by the Commission.

2.16 Toll Presubscription

2.16.1 Toll Presubscription is a procedure whereby a customer designates to the Company the IntraLATA and InterLATA Toll Providers, i.e., Interexchange Carriers (IXCs), which the Customer wishes to be the carriers of choice for toll Calls. Such Calls are automatically directed to the designated carrier(s) without the need to use carrier access codes or additional dialing to direct the Calls to the designated carrier. Toll presubscription does not prevent a customer, who has presubscribed to a toll carrier, from using carrier access codes or additional dialing to direct Calls to an alternative toll carrier on a per Call basis. Each carrier will have one or more access codes assigned to it for various types of service. When an end user selects a carrier as its preferred IXC, only one access code of that carrier may be incorporated into the switching system of the Company permitting access to that carrier by the end user without dialing an access code. Should the same end user wish to use other services of the same carrier, it will be necessary for the end user to dial the necessary access code(s) to reach that carrier's other service(s). An IXC must use Feature Group D (FGD) Switched Access Service to qualify as a presubscription toll provider unless prior arrangements have been made with or by the Telephone Company. IXCs must submit an Access Service Request (ASR) to the Telephone Company.

Selection of toll presubscription provider by an end user is subject to the terms and conditions following.

COMPETITIVE LOCAL EXCHANGE CARRIER

- 2.16.2 At the option of the IXCs, the nonrecurring charge for a change in toll presubscription, as provided herein, may be billed to the IXCs, instead of the end user (NRC PIC). This may involve charges resulting from end-user initial free choice Preferred Interexchange Carrier (PIC), specified as follows.
- 2.16.3. Presubscription Charge Application
End user choices for toll presubscription:
- 2.16.3.1 Designating an intraLATA and interLATA IXC(s) as primary carrier(s) thereby requiring no access code to access those IXCs' service. End users are not required to choose the same IXC for intraLATA and interLATA toll presubscription. Other nonpresubscribed IXCs are accessed by dialing 10XXX, 101XXXX, or other required codes.
- 2.16.3.2 Choosing no carrier as a primary carrier thus requiring 10XXX or 101XXXX code dialing to access all IXCs.
- 2.16.4 If a new customer cannot decide upon presubscription IXCs, the Company may extend a 30 calendar day period following completion of the initial service request to make a choice without charge. In the interim, the customer will be assigned as a 'No-PIC' and must dial an access code to make toll Calls. (C)
- 2.16.5 If an IXC elects to discontinue Feature Group, the IXC is obligated to contact, in writing, all end users who have selected the canceling IXC as their preferred toll provider. The IXC must inform the end users that it is canceling its Feature Group D Service, request that the end user select a new IXC, and state that the canceling IXC will pay the PIC change charge as provided herein (PIC Change). The IXC must provide written notification to the Telephone Company that this activity has taken place. Following the IXC's discontinuance of service, the Company will bill the canceling IXC the change charge for each end user that is currently designated to the IXC at the time of discontinuance (PIC Change).
- 2.16.6 An unauthorized PIC change is a change in the presubscribed IXC that the end user denies authorizing. PIC disputes for end users are resolved through an investigative process.
- If an unauthorized change in toll presubscription occurs, the IXC making the unauthorized change will be assessed a charge for unauthorized change in

 COMPETITIVE LOCAL EXCHANGE CARRIER

presubscription as provided at the end of this section (PIC Change). In addition, the IXC will be assessed the applicable charge for returning the end user to the preferred IXC (PIC Change).

2.17 **Caller ID Blocking**

A calling party may block the passage of his/her telephone number, associated main listed name and voiceback of calling identification information to users or subscribers to Optional Central Office Services which utilize Signaling System 7 (SS7) technology. Blocking will also prevent Call completion through the use of Return Call (*69) Service. Customers have two blocking options as follows: (C)
(C)

2.17.1 Per-Call Blocking - To activate per-Call blocking, a customer dials a special code prior to placing a Call. Blocking will be activated for that outgoing Call only. There is no charge for using per-Call blocking, and it is provided on an unlimited basis. Per-Call blocking is available to all customers in the Company's serving territory, or (C)
(C)
(C)
(C)

2.17.2 Per-Line Blocking - Per-Line Blocking must be added to a customer's line by contacting the Telephone Company's business office and having a service order issued. All Calls are automatically blocked when a customer subscribes to Per-Line Blocking unless the blocking feature is deactivated. If a customer subscribes to Per-Line Blocking, he/she can deactivate blocking by dialing a special code prior to placing a Call. Blocking will be deactivated for that outgoing Call only. As facilities permit, a Per-Line Blocking customer will be provided with a separate code to deactivate blocking, which is different from the per Call blocking code. Where this separate code is not available, the code for per-Call blocking and the code to deactivate Per-Line Blocking will be the same. Per-Line Blocking is available to all customers in the Company's serving territory. Per-Line Blocking is provided without charge, except as discussed below. (C)
(C)
(C)
(C)
(C)

2.17.3 Per-Line Blocking will be available to all customers, free of charge, in the Company's serving area and can only be added or removed from a customer's line by placing a service order with the Company. Initial requests for Per-Line Blocking will be provided at no charge. Subsequent requests for Per-Line Blocking for the same customer and telephone number at the same

 COMPETITIVE LOCAL EXCHANGE CARRIER

address may be charged the applicable non-recurring charge(s). This non-recurring charge will be waived for customers of the Company who are victims of domestic violence, the staffs of domestic violence programs and agencies, and emergency services personnel, while performing their jobs.

- 2.17.4 Customers who use either per-Call blocking or line blocking may be unable to complete Calls to Caller ID subscribers who have activated the Anonymous Call Rejection feature (ACR) of Caller ID services. If a customer using blocking Calls a Caller ID subscriber who has activated Anonymous Call Rejection, he/she will hear an announcement that the Caller ID subscriber is not accepting blocked Calls. There are several ways to complete a Call to a Caller ID subscriber who has activated Anonymous Call Rejection: (1) place the Call through an operator; (2) place the Call on the Company's network using a Company's telephone calling card; or (3) place the Call without blocking. Options (1) and (2) involve charges in addition to the cost of the Call. However, the live operator surcharge will be waived for the Company's customers who are victims of domestic violence, the staffs of domestic violence program agencies and emergency service personnel, while in the performance of their jobs. If the operator surcharge cannot be waived when the Call is being placed, the Company will, upon notification, credit the live operator surcharge to the aforementioned party's telephone bill. Furthermore, should alternative methods become available in the future which permit the aforementioned to access the ACR party without revealing the caller's telephone number, the Company will waive any additional charges associated with such alternative methods. Blocked Calls routed to the Anonymous Call Rejection (ACR) announcement will not be rated as completed Calls. (C)

(C)
(C)
- 2.17.5 Caller ID blocking will not prevent the delivery of telephone numbers to 911 emergency service providers. Caller ID blocking currently will not work for callers who place Calls to 8xx, 900, and/or other information and message services carrying a specific charge billed to a caller by a local telephone company. (C)
- 2.18 **9-1-1 Emergency Service (E9-1-1 or NG9-1-1)**
- 2.18.1 The 9-1-1 Emergency Services Customer may be a municipality, other federal, state or local governmental unit, an authorized agent of one or more municipalities or other federal, state or local governmental units to whom authority has been delegated (e.g., PSAP). The Customer must be authorized to subscribe to the service by the Governing Authority and have public safety

COMPETITIVE LOCAL EXCHANGE CARRIER

- 2.18.2 9-1-1 Emergency Services are provided by the Company where facilities and operating conditions permit.
- 2.18.3 9-1-1 Emergency Services are not intended as a total replacement for the local telephone service of the various public safety agencies that may participate in the use of this service. The Customer must subscribe to additional Local Exchange Services for purposes of placing administrative outgoing Calls and receiving other Calls. (C)
- 2.18.4 Application for 9-1-1 Emergency Services must be executed in writing by the Customer. If execution is by an agent, satisfactory evidence of the appointment must be provided in writing to the Company. At least one local law enforcement agency must be included among the participating agencies.
- 2.18.5 9-1-1 Emergency Services are provided solely for the benefit of the Customer as an aid in handling 9-1-1 Calls in connection with fire, police and other emergencies. The provision of 9-1-1 Emergency Services by the Company shall not be interpreted, construed, or regarded, either expressly or implied, as being for the benefit of or creating any relationship with or any Company obligation direct or indirect, to any third person or entity other than the Customer. (C)
- 2.18.6 The Company does not undertake to answer and/or forward 9-1-1 or other emergency Calls, but furnishes the use of its facilities to enable the Customer's personnel to respond to such Calls. (C)
(C)
- 2.18.7 The rates charged for 9-1-1 Emergency Services do not contemplate the inspection or constant monitoring of facilities that are not within the Company's control, nor does the Company undertake such responsibility. The Customer shall make such operational tests that are required in the judgment of the Customer. The Customer shall promptly notify the Company in the event the system is not functioning properly.
- 2.18.8 The Company's liability for any loss or damage arising from errors, interruptions, defects, failures, or malfunctions of this service or any part thereof shall not exceed an amount equivalent to the pro rata charges for the

COMPETITIVE LOCAL EXCHANGE CARRIER

service affected during the period of time that the service was fully or partially inoperative.

- 2.18.9 The Customer must furnish the Company its agreement to the following terms and conditions:
- 2.18.9.1 All 9-1-1 or other emergency Calls will be answered on a 24-hour day, seven-day week basis. (C)
- 2.18.9.2 The Customer has responsibility for dispatching the appropriate emergency services, or will undertake to transfer all emergency Calls received to the governmental agency with responsibility for dispatching such services, to the extent that such services are reasonably available. (C)
- 2.18.9.3 The Customer will develop an appropriate method for responding to Calls for nonparticipating agencies that may be directed to their PSAP by calling parties. (C)
- 2.18.9.4 The Customer will subscribe to Local Exchange Service at the PSAP location for administrative purposes, for placing outgoing Calls, and for receiving other Calls. (C)
(C)

- 2.18.10.3 Define the unique combinations of public safety agencies (police, fire, medical, etc.) responsible for providing emergency response services in any specific geographic location.
- 2.18.11 When the Call Routing is provided, the Customer is responsible for identifying primary and secondary PSAPs associated with the unique combinations noted herein and providing the access or telephone numbers required to support the selective transfer feature of Call Routing. (C)
(C)

 COMPETITIVE LOCAL EXCHANGE CARRIER

- 2.18.12 After establishment of service, it is the Customer's responsibility to continue to verify the accuracy of the routing information contained in the master address file, and to advise the Company of any changes in street names, establishment of new streets, closing and abandonment of streets, changes in police, fire, emergency medical or other appropriate agencies' jurisdiction over any address, annexations and other changes in municipal and county boundaries, incorporation of new cities or any other matter that will affect the routing of 9-1-1 Calls to the proper PSAP. (C)
- 2.18.13 The following terms define the Customer's responsibilities with respect to any information provided by the Company to the Customer as part of E9-1-1 ALI Services or NG9-1-1 Location Services and NG9-1-1 Additional Data: (C)
(C)
- 2.18.13.1 Such information shall be used by the Customer solely for the purpose of aiding the Customer in identifying, updating and/or verifying the addresses of 9-1-1 callers within the Customer's serving areas in connection with the Customer's provision of emergency response services.

2.19 GENERAL

The Service Access Code 9-1-1 allows the customer to reach the appropriate emergency services including police, fire and medical services. Enhanced 9-1-1 has the ability to selectively route an emergency Call to the primary 9-1-1 provider so that it reaches the correct emergency service located closest to the caller. In addition, the Customer's address and telephone information will be displayed to the primary 9-1-1 provider for display at the Public Answering Point (PSAP). (C)

Pursuant to the Public Safety Emergency Telephone Act (Act 78 of 1990), as amended), the Telephone Company collects a fee from its customers on behalf of the counties in its operating area to support the 9-1-1 system. Counties of the first through second class may impose a monthly contribution rate in an amount not to exceed \$1 per line on each local exchange access line. Counties of the third through fifth class may impose a monthly contribution rate in an amount not to exceed \$1.25 per line on each local exchange access line. Counties of the sixth through the eighth class may impose a monthly contribution rate not to exceed \$1.50 per line on each local exchange access line. The contribution rate may be used by counties for the expenses of implementing, expanding or upgrading a 911 system.

Parties dialing 9-1-1 waive the privacy afforded by non-listed and non-published service to the extent that the telephone number, names, and address associated with the originating station location are furnished to the Public Safety Answering Point.

3. **DESCRIPTION OF 9-1-1 EMERGENCY SERVICES**

9-1-1 Emergency Services are offered subject to the availability of facilities.

9-1-1 Emergency Services are telecommunications services that permit a Public Safety Answering Point (PSAP) to receive emergency Calls placed by (C)

COMPETITIVE LOCAL EXCHANGE CARRIER

dialing the number 9-1-1 and/or emergency Calls originated by telephony devices, personal communications devices, alarms or sensors.

9-1-1 Emergency Services support interconnection to other Originating Service Providers for the purpose of receiving emergency Calls originating in the other providers' networks. 9-1-1 Emergency Services include 9-1-1 Routing and Transfer Services that use a Call management system to either directly perform the geospatial or selective routing of an emergency Call to the appropriate PSAP, or may be used to hand-off the Call to a separate 9-1-1 Service Provider (possibly a legacy 9-1-1 Selective Router) for Call completion to the appropriate PSAP. 9-1-1- Emergency Services also provide services of Call Bridging and post Call activity reporting.

E9-1-1 ALI Services includes a comprehensive data management and delivery service. ALI Services provide ALI record discrepancy resolution, reporting, and trouble ticketing for all Call types. The solution includes a web interface for data queries, MSAG management, and trouble ticketing.

NG9-1-1 Location Database Service includes the ongoing utilization of ALI in an NG9-1-1 Call Routing deployment in support of customers transitioning to the usage of GIS data for Geospatial Routing.

NG9-1-1 ECRF/LVF Service includes a Spatial Interface (SI) for the importation of Geospatial Information into the ECRF/LVF data base.

The Customer is the Governing Body that orders service and is responsible for the payment of charges and compliance with the terms and conditions of this Tariff.

9-1-1 Emergency Services are only available under contract with a minimum term agreement of one (1) year.

3.1**Network Elements**

The Company's solution utilizes a redundant, secure IP infrastructure. Facilities and nodes are geographically diverse and are equipped with physically redundant data communications and power equipment that allow for continuous operation and reliability. COMPETITIVE LOCAL EXCHANGE CARRIER

Telecommunications Service Priority (TSP) is provided on all network circuits, as applicable or allowable.

3.1.1

Ingress Network

Originating Service Providers (OSP) shall connect TDM traffic to the Company's Legacy Network Gateways (LNG) as specified by the Company at the OSP Point of Interconnection (POI) or a Company defined Meet Point within the Incumbent Local Exchange Carrier network.

OSP originated SIP traffic must terminate at the OSP POI of the Company specified data centers.

(D)

(D)

3.1.1.1

Legacy Selective Router Gateways (LSRG's) will provide trunking back to the existing E9-1-1 LEC tandem during the transitional phase. These trunks will allow Call Transfers between the LEC E9-1-1 tandem and the Company's Call routers and vice-versa.

The Company will provide the LSRG and trunks that the Company deems necessary for the handling of E9-1-1 Call Transfer between the Company's Call router and those PSAPs which remain connected to the existing E9-1-1 LEC tandem.

COMPETITIVE LOCAL EXCHANGE CARRIER

3.1.1.2 The Company will provide Inter-tandem trunks to LEC 9-1-1 Tandems matching the current inter- tandem trunking services provided to the PSAP.

Additional Inter-tandem trunks to other E9-1-1 tandems are chargeable (refer to section 3.1.3.6).

3.1.2 **ESInet (Egress)**

The Company will terminate its IP transport to 1) the Legacy PSAP Gateway where the PSAP 9-1-1 analog trunks terminate or when the Company is to connect to an IP enabled Call Handling System, the Company will terminate its IP transport, 2) to the IP router serving the IP enabled Call Handling System. Legacy PSAP Gateways are offered separately via ICB arrangements.

3.1.2.1 The Company will provide IP Transport from Data Center to the PSAP's Call Handling System Host or Gateway.

The IP network connects the Data Center to the Call Handling System Host.

3.2 E9-1-1 Emergency Service**3.2.1 E9-1-1 Call Routing**

E9-1-1 Call Routing Service is a public safety grade, specialized managed network for processing 9-1-1 Calls that allows the PSAP to accommodate new technologies while simultaneously enabling more control over 9-1-1 Call Routing operations. E9-1-1 Routing Service delivers emergency Calls from both traditional and non-traditional voice networks. In addition to processing traditional TDM voice traffic, E9-1-1 Routing Service also provides IP based Call processing capabilities. (C)
(C)

The Company's E9-1-1 Routing facilitates interoperability and allows for specialized management of different Call types. The Customer can designate, capture, and report on specific instructions for handling each of the following Call types: (C)

Wireline: Supports traditional wireline emergency Calls originating from an end office, central office and/or enterprise PBX over standard based 9-1-1 analog circuits, DS-1 Channel Associated Signaling (CAS), SS7 and PRI interfaces. (C)

Wireless: Supports delivery of wireless 9-1-1 Calls to assigned PSAPs. Carriers having the capability to provide wireless handset ANI, cell site and sector and/or longitudinal and latitudinal (x,y) coordinates in the appropriate format, may connect directly to the 9-1-1 Routing Service. (C)

VoIP: Supports delivery of VoIP emergency Calls originating from a VoIP Service Provider. VoIP Service Providers capable of providing Calls and data in the appropriate format can connect directly to the 9-1-1 Routing Service

3.2.1.1 E9-1-1 Call Routing Service Features**Automatic Number Identification (ANI)**

ANI is the feature by which the telephone number or other related routing (pANI) number associated with an inbound 9-1-1 caller is received by the Company's E9-1-1 Emergency Services and passed on to the proper PSAP. The ANI is also used to determine the proper PSAP to receive the inbound Call. (C)

(Information previously found on this page has been moved to Page 49, 51, and 55.1) (C)
(Information on this page was previously found on Pages 49 & 50) (C)

 COMPETITIVE LOCAL EXCHANGE CARRIER

IP Selective Routing

The routing of a 9-1-1 Call to the proper PSAP based upon the location of the caller. Selective Routing is typically accomplished by mapping the ANI to an ESN that has been derived based on the caller's location. The ESN maps to a specific routing rule that identifies the PSAP and possible alternative destinations.

(C)

Trunk Only Routing

Inbound trunks, typically from a given telecommunications carrier, can be designated to route all Calls to a given destination, usually a specific PSAP. If Trunk Only Routing is not specified the system will attempt to perform Selective Routing.

(C)

Default Routing

When an incoming 9-1-1 Call cannot be selectively routed due to the reception of an ANI number that is either not stored in the selective router data base, unintelligible ANI or when no ANI number is passed, a predetermined Call route will be chosen and the caller will be terminated to the PSAP based upon the incoming trunk facility the Call is passed over.

(C)

(C)

(C)

PSAP Abandonment Routing

If a situation arises where a PSAP must be closed or evacuated, this feature provides specific routing instructions for delivery of Calls to recovery locations.

(C)

3.2.1.2 9-1-1 Transfer Options

Fixed Transfer

Fixed transfer is a feature that enables a PSAP Call taker to transfer a 9-1-1 Call to a secondary destination (possibly another PSAP) by dialing a pre-assigned speed dial code or by use of a single button on an approved Customer telephone system that dials the appropriate code.

(C)

Selective Call Transfer

Selective Call Transfer is a feature enabling a PSAP Call taker to transfer an incoming 9-1-1 Call to another agency by dialing a pre-assigned speed dial code associated with police, fire or medical agencies or by use of a single button on an approved Customer telephone system that dials the appropriate code. The specific transfer destination is determined by the caller's originating location as specified by the ESN.

(C)

(Information on this page was previously found on Pages 50 and 51.)

(C)

 COMPETITIVE LOCAL EXCHANGE CARRIER

Manual Transfer

A PSAP Call taker may transfer an incoming Call manually by depressing the hook switch of the associated telephone or the "add" button on approved Customer telephone system, and dialing either an appropriate seven or 10-digit telephone number. (C)

Alternate Routing

The capability of routing 9-1-1 Calls to a designated alternate destination if all 9-1-1 trunks are busy or out of service. May be activated upon request or automatically, if detectable, when 9-1-1 equipment fails or the PSAP itself is disabled. (C)

3.2.1.3 Call Event Logging

The Call Event Logging feature delivers reporting information containing the ANI received from a 9-1-1 Call, the identity of the incoming trunk the Selective Router received the Call over, the identity of the outgoing PSAP trunk the Call is terminated to, and the date and time the Call was delivered to its target destination, transferred and/or disconnected. (C)

3.2.2 **9-1-1 ALI Services**

9-1-1 ALI Services are described below. Any additional features or functionality requested by the Customer may be considered on an ICB basis. (C)

3.2.2.1 MSAG Management

The Company provides a data management and administration tool that automates the viewing and communication of updates, insertions, and deletions to the MSAG database. (C)

3.2.2.2 Database Standards Compliance

The Company acts as the facilitator with the addressing authority in the maintenance of the MSAG utilizing recognized National Emergency Number Association (NENA) recommended standards. (C)

3.2.2.3 Subscriber Record Management

Subscriber Record Management is the collection of service order records from Originating Service Providers, validation of those records against the MSAG, and storage of the records for the generation of the ALI database. (C)

- 3.2.2.4 ALI Database Updates
After processing and validating subscriber record updates, the Company processes ALI records for Call Routing and for retrieval and display by the PSAP during 9-1-1 Calls. (C)
(C)
- 3.2.2.5 ANI/ALI Discrepancy Resolution
An ANI/ALI discrepancy occurs when an ALI record delivered to a PSAP does not match the information of the caller. The Company will investigate ANI/ALI discrepancy reports and refer each discrepancy to the respective Originating Service Provider for resolution.
- 3.2.2.6 Misroute Resolution
An ANI/ALI misroute occurs when a 9-1-1 Call is delivered to the incorrect PSAP. The Company investigates ANI/ALI misroute reports and refers each misroute report to the Originating Service Provider for resolution. (C)
- 3.2.2.7 No Record Found (NRF) Resolution
An NRF occurs when the ANI provided does not exist in the ALI database and/or when NRF is displayed at the PSAP. The Company will resolve or refer each NRF to the respective Originating Service Provider for resolution. (C)
- 3.2.2.8 ALI Delivery
ALI Delivery provides location information via the ALI Data Access Connections to a PSAP during a 9-1-1 Call. (C)
- 3.2.2.9 Data Support of Wireless and VoIP 9-1-1
The Company's database management systems support both Phase I and Phase II wireless and VoIP 9-1-1 Call processing. This includes the E2 interface used by wireless service providers to communicate 9-1-1 caller location information to the ALI database. (C)
- 3.2.2.10 ALI Metrics Reporting
The Company provides access to reports that provide details on data transactions, the number of records processed, and the number of errors.
