Supplier Hierarchy Reference

HIERARCHY SUMMARY

Motorola Solutions recently updated their supplier hierarchy mapping to providing suppliers visibility to information within a hierarchy using the iSupplier portal. This update also provides consolidated and consistent reporting functionality.

User VIew	Parent Relationship	Child Relationship
iSupplier	• Suppliers can **view all Children and Parent** Purchase Order (POs)	• Suppliers can **only view the Child PO's** at child level.
Collaborative Planning	• Suppliers are able to **view demand at Parent** level • **No Hierarchy** View • **No Concept** of Parent or Child level	• Attached to only **specific (e.g. company, site, etc.)** from parent level • Suppliers can only **perform tasks at assigned Child level**
Sourcing	• **Run sourcing event**, accept sourcing event levels at Parent level	• Attached to only specific (e.g. company, site, etc.) from parent level • Suppliers can only **perform tasks at assigned Child level**
