ORCHESTRATE + AVIGILON ALTA VIDEO SECURITY INTEGRATION

INCREASE SITUATIONAL AWARENESS AND MAKE BETTER-INFORMED DECISIONS DURING CRITICAL EVENTS

Rethink security and investigate smarter and faster with the Avigilon Alta cloud-based video solution. Avigilon Alta video combines AI analytics and operational insights with real-time visibility, from anywhere. Leverage AI-driven intelligence and alerts to identify potential security threats, so you can take control of the situation before it escalates.

At Motorola Solutions, we've taken the benefits of cloud-based video security solution for enterprises one step further by connecting the technology with Orchestrate, our workflow automation tool. With this integration, your Alta video security system can trigger real-time alerts to improve situational awareness and enhance your team's productivity and safety.

DETECT
Alert is sent to security operations center and personnel that a person is in a location at an unusual time of day.

ANALYZE
Nearby camera feeds are populated and the closest security personnel are identified.

COMMUNICATE
After the initial radio alert, intruder image and location sent to nearby security teams in the field. Anticipated escape route determined, lockdown is facilitated and security directed to intercept.

RESPOND
Public Safety is notified and security team apprehends intruder while wearing body-worn cameras. The incident is logged with pre-populated fields and relevant incident data.
